Course Outcomes (COs), Programme Outcomes (POs) as well as Programme Specific Outcomes (PSOs)

Mechanism of Communication:

- The college has well stated Course Outcomes (COs), Programme Outcomes (POs) as well as Programme Specific Outcomes (PSOs) duly recommended from IQAC and there is well defined mechanism to communicate the same to teachers and students.
- Soft copy of Course Outcomes (COs), Programme Outcomes (POs) as well as Programme Specific Outcome (PSOs) is displayed on college website.
- Hard copy is available in the Library as well as departments for ready reference to the teachers and students.
- Students are also made aware of the same by the teachers in their respective classes.

DAYANAND MAHILA MAHAVIDYALAYA

COURSE OUTCOMES

Name of Programme: B.A. (General)

English

Semester-I

Paper: EN 21 English

- CO1: The course provides an opportunity to the students to improve their pronunciation with the help of speech sounds and symbols.
- CO2: A brief analysis of essays included in the textbook would help the students to study different aspects of one's societal life on the whole.
- CO3: With the help of vocabulary exercises students can improve their vocabulary which in turn helps them to improve their comprehension.

Semester-II

Paper: EN 22 English

- CO1: There are short stories prescribed in the syllabus. By reading short stories, students are totally attached with the characters of stories. These stories have life like incidents.
- CO2: Sometimes the characters of the stories become role model for the students.
- CO3: The students get the detailed knowledge and practice through the sentences, voices and various topics of grammar and it will help them to develop oratory and writing skills along with good vocabulary.

Semester-III

Paper: 23 EN English

- CO1: William Shakespeare, Alexander Pope, Thomas Gray and William Wordsworth etc are the celebrated poets of their particular age, so the knowledge of the students about literature is enhanced.
- CO2: As the poems taken into the book cover a wide range of forms of expression, the students are able to develop an understanding of nuances of a variety of poetic expression.

CO3: Comprehension questions that followed are designed to help students develop and hone their linguistic competence.

CO4: The course also helped the students to understand and practice the exact pronunciation of English words.

CO5: Enrich the students' ability to critically appreciate the poetic expressions.

Semester-IV

Paper: EN 24 English

CO1: As the plays are taken from various socio-cultural contexts and cover a wide range of dramatic expressions, enriched the students' knowledge about various dramatic forms and their surroundings.

CO2: Comprehension questions that followed developed and sharpened the students writing and critical thinking skills.

CO3: Each chapter includes exercises of vocabulary and writing skills that enhanced students' vocabulary of language and composition skills.

CO4: Ample practice exercises are provided in writing e-mails, dialogues, resumes and book reviews.

CO5: The translation exercises from Hindi to English and English to Hindi enabled the students to use the language fluently.

CO6: The course also made the students to understand and practice the pronunciation of English words and thus increased their language proficiency.

Semester-V

Paper: EN 25 English

After Completing the Novel Raja Rao's 'Kanthpura' given in course, the students will be able to:

CO1: Understand Indian English Literature and its forms.

CO2: Penetrate the colonialism and post-colonialism.

CO3: Understand Raja Rao's ideology and his style of writing.

CO4: Understand the pre-independence scenario reflecting social differences, political strategies and religious conflicts.

CO5: Enhance their critical reading and writing skills.

CO6: Know the origin, development and forms of novel.

CO7: Understand different literacy devices.

CO8: Improve their speaking specially pronunciation of words.

Semester-VI

Paper: EN 26 English

After Completing the Shakespeare's 'The Merchant of Venice' given in course, the students will be able to:

CO1: Understand the drama especially Elizabethan drama and its forms.

CO2: Be familiarized with the great dramatist and his university.

CO3: Be conversant with the social problems and complexity of relations through this one text only.

CO2: ਇਸ ਪੁਸਤਕ ਵਿਚ ਸ਼ਾਮਿਲ ਕਵਿਤਾਵਾਂ ਨੂੰ ਆਧਾਰ ਬਣਾ ਕੇ ਵਿਦਿਆਰਥੀਆਂ ਨੂੰ ਅਧਿਆਤਮਵਾਦ, ਰਹੱਸਵਾਦ, ਇਸ਼ਕ ਹੱਕੀਕੀ ਅਤੇ ਬੀਰਤਾ ਲਈ ਪ੍ਰੇਰਿਤ ਕੀਤਾ ।

CO3: ਪੰਜਾਬੀ ਸਾਹਿਤ ਦਾ ਇਤਿਹਾਸ (ਆਰੰਭ ਤੋਂ 1700 ਤੱਕ) ਨੂੰ ਆਧਾਰ ਬਣਾ ਕੇ ਵਿਦਿਆਰਥੀਆਂ ਨੂੰ ਆਦਿ ਕਾਲ ਵਿਚ ਰਚਿਤ ਪੰਜਾਬੀ ਸਾਹਿਤ ਦੀ ਵਿਭਿੰਨ ਧਾਰਾਵਾਂ ਦਾ ਅਧਿਐਨ ਕਰਾਇਆ।

CO4: ਮੱਧਕਾਲ ਵਿਚ ਰਚਿਤ ਸੂਫੀ-ਕਾਵਿ, ਗੁਰਮਤਿ-ਕਾਵਿ, ਕਿੱਸਾ-ਕਾਵਿ, ਬੀਰ-ਕਾਵਿ ਅਤੇ ਵਾਰਤਕ ਤੋਂ ਜਾਣੂ ਕਰਾਇਆ ।

CO 5: ਪੰਜਾਬੀ ਭਾਸ਼ਾ ਦੇ ਵਿਕਾਸ ਬਾਰੇ ਜਾਣਕਾਰੀ ਪ੍ਰਦਾਨ ਕੀਤੀ।

CO6: ਮੱਧਕਾਲ/ਮੁਗਲ ਕਾਲ ਨੂੰ ਪੰਜਾਬੀ ਸਾਹਿਤ ਦਾ 'ਸੁਨਿਹਰੀ ਕਾਲ ਕਿਉਂ' ਕਿਹਾ ਜਾਂਦਾ ਹੈ, ਬਾਰੇ ਜਾਣੂ ਕਰਾਇਆ ।

CO7: ਆਧੁਨਿਕ ਪੰਜਾਬੀ ਸਾਹਿਤ ਦੇ ਵਿਭਿੰਨ ਰੂਪਾਂ ਦੀ ਬਣਤਰ ਬਾਰੇ ਚਰਚਾ ਕੀਤੀ ।

CO8: ਪੰਜਾਬੀ ਤੋਂ ਹਿੰਦੀ ਵਿਚ ਅਨੁਵਾਦ ਬਾਰੇ ਵਿਦਿਆਰਥੀਆਂ ਨੂੰ ਜਾਣਕਾਰੀ ਪ੍ਰਦਾਨ ਕੀਤੀ ।

CO9: ਵਚਨ ਅਤੇ ਲਿੰਗ ਦੇ ਗਿਆਨ ਰਾਹੀਂ ਪੰਜਾਬੀ ਭਾਸ਼ਾ ਦੀ ਸਹੀ ਵਰਤੋਂ ਦਾ ਵਿਦਿਆਰਥੀਆਂ ਨੂੰ ਅਧਿਐਨ ਕਰਾਇਆ ।

B.A. Health and Physical Education

Course Outcomes (COs)

Semester- I

Paper: PE 21

CO1: Students are enabled to understand the meaning, scope, aim and objectives of physical education in relevance to modern society.

CO2: Students learn about the importance and misconceptions regarding physical education.

CO3: Students be acquainted with the role and importance of person hygiene to maintain proper health. Students also learn about factors affecting health and personal hygiene.

CO4: Students can acquire knowledge about the concept of Yoga; its types and importance for healthy living.

CO5: Students learn about the relationship between human anatomy and physiology with physical education.

Semester- II

Paper: PE 22

CO1: Students are enabled to understand the subject matter of first aid, its aim, objectives and applications in common injuries.

CO2: Students learn about the historical aspects of physical education: Pre and Post-independence of India. State and National sports policy.

CO3: Gain knowledge about meaning, importance, components and principles of physical fitness.

CO4: Students study the concept of bones and joints in human body.

Semester- III

Paper: PE 23

CO1: Students get to know the concept of safety education, sports injuries and their general treatment.

CO2: Students learn thoroughly about communicable and non-communicable diseases.

CO3: Students get to know about meaning, importance and components of balanced diet and also about factors affecting it.

CO4: Students understand the structure and functioning of heart and role of exercise in maintaining heart health.

Semester- IV**Paper: PE 24**

CO1: Students learn meaning, types, significance and physiological aspects of warming up and cooling down.

CO2: Students understand the concept of sports psychology, laws and learning curve.

CO3: Students learn about the major sports events like Asian games, Commonwealth games, Ancient Olympic Games and Modern Olympic games.

CO4: Students be acquainted with the respiratory system and role of exercise on respiratory system.

Semester- V**Paper: PE 25**

CO1: Students understand the meaning, stages, principles and factors influencing growth and development.

CO2: Students learn about the role of sports organization and administration in sports activities.

CO3: Students be acquainted with the concept of posture and its relevance in sports activities and posture deformities.

CO4: Students learn about the gross anatomy of muscles, muscular system, composition of human blood and its function.

Semester- VI**Paper: PE 26**

CO1: Students understand the concept of motivation and socialization for sports persons.

CO2: Students get acquainted with the role of sports training and its types meaning of doping and its effects on health.

CO3: Students learn about the sports Biomechanics and role of Newton's laws and levels in sports.

CO4: Students gain knowledge regarding digestive system; its organs, structure, mechanism of food digestion and role of exercise on digestive system.

B.A. Political Science**Course Outcomes (COs)****Semester- I****Paper: PS 21 (I) Indian Constitution**

CO1: Students are introduced to the Indian Constitution with a focus on the role of the constituent assembly and examine the essence of Preamble.

CO2: Students examine the Fundamental Rights and Duties of Indian citizens with a study of the significance and status of Directive Principles.

CO3: Students can critically analyze the important institution of the Indian Union: the Executive: President, Prime Minister, Council of Minister, Governor, Chief Minister, the legislature: Rajya Sabha, Lok Sabha, Speaker, Committee System , State Legislature and also the working of Gram Panchayat, Gram Sabha and duties of the Sarpanch has the executive knowledge about the need and mechanisms of the constitutional amendments.

CO4: Students will get to know that judiciary is an important pillar of our successful democracy. The content will make students aware of the judiciary levels—Supreme Court and the High Courts: composition and functions-- Judicial Activism.

Semester- II

Paper: PS 22(I) Indian Politics (Option i)

CO1: Indian being a federal state with unitary features, students will learn about Centre State relations. Principles of healthy federation and also sharing of powers and revenue between Centre and States.

CO2: Evaluating the Electoral Process in India with focus on the Election Commission Composition, Functions and roles.

CO3: Critically evaluating the Indian Party System, its development and looking at the ideology of dominant National Parties.

CO4: Evaluating the role of various forces on Indian Politics, religion, language, Caste, Tribe and regionalism.

Semester- III

Paper: PS 23(ii) Indian Political Thinkers (Option ii)

CO1: Tracing the evaluation of Indian Political Thinkers from ancient India to modern India.

CO2: Analyzing the nationalist thinkers of Raja Ram Mohan Roy.

CO3: Assessing the nationalist Thinker of Vivekananda.

CO4: Tilak was one of the first and strongest advocates of Swaraj (Self-Rule) and a strong radical in Indian consciousness.

Semester- IV

Paper: PS 24(II) Indian Political Thinkers (option ii)

CO1: Discussing the nationalism of Gandhi. Social changes due to working of democracy and for applying Gandhian Model and the concept of the Welfare State.

CO2: Describing the movements against caste and untouchability, Ambedkar's views in social justice and the class.

CO3: Liberal democracy and its benefits, necessity of a democracy which develops inclusive society and all have equal rights to take part.

Semester- V

Paper: PS 25(I) Comparative Politics (option i)

CO1: Need and significance of politics for modern state and comparison of different political systems in the world.

CO2: Knowledge about various approaches of comparative politics and relevance in changing political setup and political equations.

CO3: Knowledge about basis of Constitutionalism and different types of Constitution and problems in constitutionalism.

CO4: Inter-linkage and interdependence of pillars of democracy- Executive, Legislative and Judiciary. The pressure groups and the political parties.

Semester- VI

Paper: PS 26(I) Comparative constitutions of UK and USA (option i)

CO1: Fundamental and significance of constitutions of the UK and USA in the Indian context and also the socio-economic basis in democracies.

CO2: Making a comparative analysis of the following constitutions of UK and USA legislature Executive and Judiciary.

CO3: The constitution of UK and USA role in keeping democracy transparent and also the role of the pressure groups and political parties.

CO4: The electoral process in UK and USA and its transparency, people attitude towards franchising and consciousness towards politics, the quality and levels of bureaucracy in UK and USA.

B.A. History

Course Outcomes (COs)

Semester- I

Paper: HR 21(I) Ancient India (Option i)

CO1: Students would have gained knowledge about meaning, concept, scope and area of History.

CO2: Students must have acquired knowledge about Stone Age and different stages of human development.

CO3: Students would have gained sufficient knowledge about Ashoka's administration and his Dhamm Policy.

CO4: Students will acquire knowledge about Harappan and Vedic Civilization.

CO5: Students are enabled to understand the maps of important sites of Harappan Civilization, extent of Ashoka's Empire and Pillars Edicts, Ports, Trade routes of ancient India, extent of Harshvardhana's and Kanishka empire.

Semester- II

Paper:HR22(I) History of India (600-1526 AD) (Option i)

CO1: Students will have an idea about the main Rajput Dynasties of Northern India as Pushyabhuti, Cholas, Rastrakutas and tripartient struggle.

CO2: Students gain the knowledge of political condition of India on the eve of Turkish invasion and a special reference to Muhammad Ghajnavi and Muhammad Ghori.

CO3: Students will gain knowledge about the nature of Delhi sultanate states in India, relation with Caliph, theory of kingship and ruling class.

CO4: Students would have got how Bhakti Movement and Sufism brought in amity in place of enmity between Hindus and Muslims.

CO5: Students are enabled to understand the maps of Sultanate state, as Allaudin Khilji reforms and Mohammad Bin Tughlaq's plans.

Semester- III

Paper:HR23(I) Political History of India (1526-1857AD) (Option i)

CO1: Students will have an idea about the political condition of India on the eve of Babur's invasion, significance of battle of Panipat.

CO2: Students would have gained knowledge about conquest of Shershah Suri, administration and land revenue system.

CO3: Students will have an idea about Akbar's contribution in consolidation of Mughal rule.

CO4: Students will be given knowledge of Mughal society, economy and liberal religious policy.

CO5: Students acquire the knowledge about establishment of English East India company and trading mission, rivalry of French and British companies, results and importance of the battle of Plassey and Buxur.

CO6: Students will understand the maps of major canters of uprising 1857 and political picture of India in the years 1520,1605 and 1707.

Semester- IV

Paper:HR24(I) Indian National Movement (Option i)

CO1: Students will gain knowledge about socio-political organization before the establishment of the Indian National Congress, aims and reactions of various classes and government towards Congress.

CO2: Students will have the knowledge, emergence of Mahatma Gandhi, non-co-operation movement, Civil-disobedience and Quit India movement, Failure and impact of these movements.

CO3: Students will have an idea about the causes, nature and programme of the revolutionary movement; A special reference to Gadar party and Bhagat Singh.

CO4: Students gain knowledge about the Indian Council Act 1909, 1919 and 1935.

CO5: Students will gain knowledge about circumstances of Indian National Army and Subhash Chander Bose.

CO6: Students will get knowledge through the maps about area and major centers of Indian National Congress and revolutionary movement.

Semester- V

Paper:HR25(I) Ancient and Medieval World (Option i)

CO1: Students gain knowledge about federalism system in Europe and its effects on European Political.

CO2: Students will get knowledge about Renaissance and reformation in Germany and Italy.

CO3: Students will gain knowledge about economic changing and merchant system, aims and effects.

CO4: Students will have idea about the knowledge of technical revolutionaries as industrial, agricultural, scientific and glorious revolution.

CO5: Students will be enabled to understand maps of major centers of capitalism, mercantilism, reformation and renaissance in world's countries.

Semester- VI

Paper:HR23(I) Modern Worlds (Option i)

CO1: Students gain knowledge about renaissance and reformation in Italy and Germany.

CO2: Students have an idea about the French and American Revolution.

CO3: Students know about the circumstances of First World War and economic depression's effect on Europe and world's countries.

CO4: Students gain knowledge about the political condition and organization in Europe in special reference to Nazism and Fascism and World War II.

CO5: Students understand the maps of major centres of renaissance and reformation, area of First World War and Second World War.

B.A. ECONOMICS

Course Outcomes (COs)

Semester-I

Paper: EC 21 Micro Economics-I

- CO1: The course enables the students to analyse the economic agents i.e. consumers and firms at micro level.
- CO2: The students will be acquainted with theories of Demand and Supply.
- CO3: They will be acquainted with utility analysis both cardinal and ordinal.
- CO4: The course also provides detailed information about theories of Cost, Revenue and Break-Even Analysis.

Semester-II

Paper: EC 22 Micro Economics-II

- CO1: The course enables the students to learn about different market conditions prevailed in economy.
- CO2: The students will be acquainted with Price Discrimination, Product Differentiation, Selling Costs.
- CO3: Students will be acquainted with the equilibrium of firm in short period and long period in various market conditions.
- CO4: The course also provides detailed information about Marginal Productivity theory of distribution and wages, Theories of Rent and Interest.

Semester-III

Paper: EC23 Macro Economics-I

- CO1: Students will learn about nature, scope and importance of Macro Economics. They will be able to understand various concepts of National Income i.e. Gross Domestic Product (GDP), Gross National Product (GNP), Net National Product (NNP) and disposable income etc. through circular flow of income among various sectors, they

will be able to understand how change in one sector affects another sector of economy.

CO2: Study of Classical and Keynesian theory of income, employment and output is helpful for understanding of change of focus of economists from free market economy to government intervention in case of depression and to increase the growth rate of income by monetary policy and fiscal policy.

CO3: With the help of complete study of consumption functions students can understand the importance of consumption in growth of economy. Consumption is important determinant of aggregate demand.

CO4: By studying investment functions, marginal efficiency of capital, investment, one can easily understand the importance of investment and economic development and how investment decisions are made considering the expected rate of profit and cost of investment.

Semester-IV

Paper: EC 24 Macro Economics-II

CO1: By learning concept of multiplier and super multiplier students can learn the importance of investment for economic development.

CO2: Course explains the base of monetary economics i.e. quantity theory of money, Keynesian liquidity theory of money and high-powered money.

CO3: Objective of price stability can be achieved by learning theories of inflation, effects, types, causes and control of inflation.

CO4: By studying theories of rate of interest and theories of business cycles, students will be able to understand trends of economy and business.

Semester-V

Paper: EC 25(I) Indian Economy-I (Option i)

CO1: Course explains the nature of capitalist, socialist and mixed economy, developed and underdeveloped economy, characteristics and major issues of Indian Economy.

CO2: Students will be able to understand major problems of Indian Economy i.e. over population. Effects of overpopulation on economic development can be understood by studying about size, growth, features, causes and measures to control population.

CO3: Understanding of the problem of poverty and unemployment will make the students able to deal with issues related with these problems and find out methods to deal with such problems.

CO4: To learn agriculture sector of India and problems of development through agriculture is useful for students to make India developed country by reducing the dependence on agriculture. Study of Special Economic Zones is also useful to understand the efforts of government to promote industries and foreign trade.

Semester-V

Paper: EC 25(III)Economics of Development-I (Option iii)

CO1: Objective of the course is to acquaint students with the growth process of economy, problems of economy, use of Index numbers to understand the position of economy.

CO2: The students will be acquainted with the problems of poverty and population and one of the best uses of economics to provide solutions to economic problems i.e. poverty, unemployment and population.

CO3: Modules incorporated in this paper are devoted to the theories of growth and various models given by eminent economists to teach students how an underdeveloped can become developed one.

CO4: Students will also understand traditional and UNDP indices for measurement of development and how these indices are prepared.

Semester-VI

Paper: EC 26(I) Indian Economy-II (Option i)

CO1: After completing this course students will have the knowledge of industries, industrial policy, industrial labour, industrial disputes and social security measures. Students can understand the environment in which business is run and future of Economy after studying planning, foreign sector, FDI, FII, MNCs and foreign institutions.

CO2: Students will be able to understand industrial development of India and importance of knowledge-based economy and details of social security measures.

CO3: Role of planning in Indian Economy is important to understand the ways to achieve economic development.

CO4: After studying foreign sector, foreign investment and foreign institutions, students will understand Globalization.

Semester-VI

Paper: EC 26(III)Economics of Development-II (Option iii)

CO1: Objective of this paper is to aware students about development process, structural shifts with development among various sectors of economy i.e. agriculture, industry and service sector.

CO2: The course helps to understand the importance of foreign sector, terms of trade and gains from trade.

CO3: Students will understand the linkage between environment and economy and common property resources. Importance of environment will also be understood by studying sustainable development.

CO4: Students will be acquainted with the role of state and relevance of planning.

B.A. Mathematics

Course Outcomes (COs)

Semester I

Paper: BM 111 Algebra

CO1: Student will learn to find the roots of the quadratic, cubic and biquadratic equations as well as solution of various linear equations, fraction equations etc.

CO2: Using Matrices, Various types of equations can be solved.

CO3: General strategy of equation solving to the problems of optimization, Business and Logical problems, grouping system can be utilized.

Paper: BM 112 Calculus

CO 1: Concept of limit, continuity and differentiability is used to analyze the graph, extrema of function by classifying maxima, minima inflexive nature.

CO 2: Anti derivative i.e. integration and its applications are useful for evaluating quadratic and other applied problems.

CO 3: Concept of trigonometric, exponential, Logarithmic functions, inverse functions, hyperbolic functions and their application is helpful to many real-world situations.

Paper: BM 113 Solid Geometry

CO 1: It emphasis the study of points, lines, shapes, and regions of solids and surface identification.

CO 2: Considering various parameters, different geometrical figures and shapes can be traced.

Semester- II

Paper: BM 121 Number Theory and Trigonometric

CO 1: Number theory is helpful to students to understand the concept of prime numbers, prime factors, congruence's, quadratic residues, Fermat's theorem, Chinese remainder theorem for solution of simultaneous equations.

CO 2: Number theory plays a vital role to coding and decoding system i.e. cryptography which is used to protect the electronically transmitted data.

CO 3: Knowledge of trigonometric, exponential and hyperbolic functions is used to find the n^{th} roots of equations.

Paper: BM 122 Ordinary Differential Equations

CO 1: It shows awareness about the classification, formation and solution of various initial and boundary value differential equations.

CO 2: Students will learn to solve homogeneous, Non-homogenous differential equation which is useful to real world scenario of applied physics, modeling, numerical solutions of various problems etc.

Paper: BM 123 Vector Calculus

CO 1: It helps to understand the nature of quantities having magnitude and direction i.e. differentiating between scalar and vector quantities.

CO 2: Students will learn cross product, dot product, scalar triple and vector triple product for finding the type of vectors e.g. orthogonal, irrotational and solenoidal nature.

CO: 3 Green's theorem, Stoke's theorem etc. are used to evaluate multiple integrals.

Semester- III

Paper: BM 231 Advanced Calculus

CO 1: Students will be able to learn maxima and minima of functions of two variables.

CO 2: To understand different indeterminate forms of limit, continuity, discontinuity of functions of two variables.

CO 3: It will help to understand behavior of curves in space.

Paper: BM 232 Partial Differential Equations

CO 1: Student will learn classification and solution of partial differential equations by conditions at boundary of the domain with different methods.

CO 2: To derive wave, heat equation etc. in one-dimensional and two-dimensional.

CO 3: To classify Partial differential equations and transform into canonical form.

Paper: BM 233 Statics

CO 1: Students will learn the basic concept of mechanics, equilibrium of rigid bodies.

CO 2: Students will understand the ability to isolate rigid bodies and to draw clear and appropriate free body diagrams.

CO 3: Students will analyze equilibrium conditions under the effect of the external forces acting on the rigid and to simplify different problems using the basic principles of mechanics.

Semester-IV

Paper: BM 241 Sequences and Series

CO 1: Students will learn the concepts of sequences, their types i.e. finite, infinite, bounded, monotonic, convergent, divergent sequence etc.

CO 2: Students will understand the concept of infinite series, sequence of partial sums, and their convergence/divergence using concepts of sequences, sum of convergent series.

CO 3: Students will learn various tests like p-series test, comparison tests, alternating series test, root test, ratio test to check the convergence or divergence of sequences and series.

Paper: BM 242 Special Functions and Integral Transform

CO 1: Students will learn to analyze the properties of special functions by their integral representations.

CO 2: Student will learn the concepts of solving different equations by the properties of Fourier Transform, Laplace Transform.

CO 3: Students will determine the properties of Legendre's polynomial which may be solved by application of special functions.

Paper: BM 243 Programming in C & Numerical Methods

CO 1: Students will be able to learn effective usage of arrays, structures, functions, pointers etc.

CO 2: Students will study different numerical methods to solve algebraic, transcendental equation, linear system of equations.

CO 3: Students will learn practical knowledge of C to apply it to learn the solution of various equations.

Semester- V

Paper: BM 351 Real Analysis

CO 1: Students will understand the concepts of real numbers, least upper bounds, greatest lower bounds, countable and uncountable sets, limit inferior, superior and limit of sequences.

CO 2: Students will learn metric spaces, open, closed, connected, bounded, totally bounded or compact sets in metric spaces.

CO 3: Students will learn continuity, discontinuity, uniform continuity of functions in metric spaces.

Paper: BM 352 Groups and Rings

CO 1: Students will understand different algebraic properties in different sets and identify sets under binary operation is group or not, abelian group, subgroups fundamentals theorem of group etc.

CO 2: Students will learn the concepts of rings, fields, unique factorization domain, integral domains and their various properties.

CO 3: Students will study permutation group, symmetries, products and various operations of cycles.

Paper: BM 353 Numerical Analysis

CO 1: To understand theoretical and practical aspects of the use of numerical analysis that will be used in the field of Sciences and in Engineering.

CO 2: Students will learn various methods of numerical integration, approximation, differentiation, numerical solution of ordinary differential equations.

CO 3: Student will learn methods of solution of equation, matrix inversion, calculation of Eigen values and Eigen vectors and will be able to find the numerical approximations and error estimation in a range of problems.

Semester- VI

Paper: BM 361 Real and Complex Analysis

CO 1: Students will learn to visualize complex numbers as points of \mathbb{C} and stereographic projection of complex plane in Riemann sphere.

CO 2: Students will understand the concept of complex functions, analytic functions, Cauchy-Riemann equations and results of harmonic functions and their properties.

CO 3: Students will understand Jacobians, Beta, Gamma functions, double and triple integral, Fourier series etc.

Paper: BM 362 Linear Algebra

CO 1: Students will learn algebraic and geometric representation of vectors in \mathbb{R}^n and their various operations in matrix algebra, vector spaces etc.

CO 2: Students will understand to determine rank, determinant, Eigen values, diagonalization, orthogonality and orthonormality of vectors.

CO 3: Students will learn dimension, basis of vector space, matrix representing a linear transformation under a given basis and will determine how the matrix changes if the basis is changed.

Paper: BM 363 Dynamics

- CO 1: Students will be able to draw free body diagram for a particle or for a rigid body in plane motion, will understand the concepts of mass, velocity, acceleration, force, work and energy etc.
- CO 2: Students will learn to analyse the general motion of rigid body on smooth and rough planes.
- CO 3: Students will learn Kepler's laws of planetary motion and will be able to solve various problems of applied physics and mechanical engineering.

B.A. Psychology

Course Outcomes (COs)

Semester-I

Paper: Introduction to Psychology

- CO 1: Students will learn the nature and objectives of studying Psychology.
- CO 2: Student will learn the concept of sensation and perception.
- CO 3: Students will learn the bodily changes during emotion.
- CO 4: Students will get opportunity to understand the concept of personality, intelligence and motivation.

Semester-II

Paper: Experimental Psychology

- CO 1: The students will learn the problems and methods of Psychophysics.
- CO 2: The students will understand the concept of learning, memory, factors leading to forgetting and memory enhancing techniques.
- CO 3: The students will acquire knowledge of descriptive statistics/ elementary statistics.

Semester-III

Paper: Social Psychology

- CO1: Students will learn nature and subject matter of social psychology.
- CO2: They will be acquainted with the concept of socialization, prejudice and pro-social behavior.
- CO3: Students will learn the causes and prevention of aggressive behavior and also about leadership.

Semester-IV

Paper: Developmental Psychology

CO 1: Students will learn the concept of Human Development along with principles and determinants of human development.

CO 2: Students will get the knowledge of different developmental stages, their characteristics and hazards of that stage.

CO 3: Elementary statistical knowledge will be imparted.

Semester-V

Paper: Psychopathology

CO1: Students will acquire knowledge about the concept of normality and abnormality and different viewpoints about abnormality.

CO2: Students will study different methods of assessment of abnormal behavior.

CO3: Students will learn the symptoms and causes of anxiety-based disorders, mood disorders and Schizophrenia.

CO4: The students will know the concept of substance abuse-causes, consequences and rehabilitation.

Semester-VI

Paper: Applied Psychology

CO 1: Students will study the meaning of Applied Psychology and careers in the field of psychology.

CO 2: Students will learn about different fields of Applied Psychology i.e. guidance and counselling, Health Psychology and Forensic Psychology etc. This will help students to choose optional subject of their interest.

CO 3: Students will attain the knowledge of correlation method of Statistics.

B.A. HOME SCIENCE

Course Outcomes (COs)

Semester-I

Paper: HS 21 Family Resource Management

This course enables the students to:

CO 1: Understand the concept and job opportunities in the field of Home Science.

CO 2: Learn the principles & elements of art.

CO 3: Gain the knowledge of interior decoration.

CO 4: Manage various resources of family in productive way.

CO 5: Learn the techniques of work simplification to conserve energy.

CO 6: Acquire the thorough knowledge about consumer education.

Semester-II**Paper: HS22 Health & Hygiene**

This course enables the students to:

- CO 1: Understand the concept of Health & hygiene.
- CO 2: Learn about the impurities of water and their purification techniques.
- CO 3: Acquire the thorough knowledge of First Aid Techniques & their importance in day to daylife.
- CO 4: know about type, mode of spread, period and channels of infection.
- CO 5: Learn the types and methods of disinfection.
- CO 6: Gain the knowledge of causes, incubation period, mode of spread, symptoms, prevention & control of various communicable diseases.
- CO 7: Understand the concept of Immunity and immunization Schedule.
- CO8: Be acquainted with the concept of cancer cause and prevention among women.

Semester-III**Paper: HS 23 Physiology**

This course enables the students to:

- CO 1: learn about structure and importance of Animal cell.
- CO 2: Understand the structure and functioning of Skeleton system.
- CO 3: Know about organs and functioning of Digestive system.
- CO 4: Understand the components, functions and working of Circulatory System.
- CO 5: Gain the knowledge about the Excretory system.
- CO 6: Recognize the organs and functioning of Reproductive system.
- CO 7: Learn about the Endocrine glands and their functions.
- Co 8: Be familiar with the parts and functions of Nervous system.

Semester-IV**Paper: HS 24 Clothing and Textile**

This course enables the students to:

- CO 1: Understand the history of Traditional textiles in India.
- CO 2: Learn the classification of Fibre.
- CO 3: Gain the knowledge about manufacture and properties of different Fibres.
- CO 4: Be acquainted with the concept of Soap, Detergents, Starches, Blues and Bleaches.
- CO 5: Learn about the meaning, objectives and types of different Bleaches.
- CO 6: Know about Basic weaves and their variations.
- CO 7: Be acquainted with the concept of Laundry and Reagents, Acid, Alkalis Solvents and

Absorbents.

CO 8: Learn about different types of Stain and their removal.

Semester-V

Paper: HS 25 Foods and Nutrition

This course enables the students to:

CO 1: Have an in-depth knowledge of Food its function, classification and essential constituents.

CO 2: Learn about the functions, food sources, daily allowances, deficiency and excess intake of different Vitamins and Mineral.

CO 3: Understand the role of Water and Dietary fiber in the body.

CO 4: Be acquainted with the principles and methods of cooking with their advantage and disadvantage.

CO 5: Learn the methods of enhancing nutritive value of Food stuffs.

CO 6: Have an in-depth knowledge of Balanced diet and concept of Meal planning.

CO 7: Learn the principles of Meal Planning during Life cycle.

CO 8: Understand the concept of Therapeutic Nutrition and different Therapeutic Diets.

CO 9: Learn the complete concept of Food Preservation.

Semester-VI

Paper: HS 26 Human Development

This course enables the students to:

CO 1: Understands the concept of Child Psychology.

CO 2: learn about the subject matter of Learning, Intelligence and Personality Development.

CO 3: Know about the definition, features and importance of Play.

CO 4: Learn about the stages of the Development.

CO 5: Know about signs and discomforts of pregnancy & also about the care of Expectant.

CO 6: Understand the care of Newborn baby and Feeding and Weaning concept in relation to the infants.

CO 7: Learn different common ailments of childhood, Skin infections and convulsions.

B.A. Music Vocal

Course Outcomes (COs)

Semester-I

Paper: MV 21 Music Vocal

- CO1: Music is one of the most profound human achievements and serves as universal sound which can create emotions and express feelings.
- CO2: A Raag is melodic framework for improvisation kin to a melodic mode in Indian classical music. Yaman Alhaiya- Bilawal and Raag Bhupali is a musical theme created by choosing a specific set of notes from within an octave.
- CO3: Each Raag is said to be originated from a Thaata. A Thaata can be simplified to a set of Swar. Various basic definitions give shape to different Raagas.
- CO4: The history of music in India can be traced back to the vedic times. The earliest ragas owe its origin to the Saamved.
- CO5: Relationship of Folk and Classical music is important as it tunes down the complexities of modern instrumentation and takes it back to basics. It gives the students an ability to focus on just honing his/her skills on just a couple instruments.
- CO6: Contribution of music in scholarships towards classical music inspires the students that making a career out of this talent, demands regular devoted practice.

Semester-II

Paper: MV 22 Music Vocal

- CO1: Music internals in Hindustani classical music. Beginners are sometimes overwhelmed with the richness of Hindustani (North Indian) Classical Music as they attempt to understand it better.
- CO2: Singing of Raag Hamiri, Varindavani Sarang and Kaafi(Classical Music). The students will feel that music also soothes the mind.
- CO3: Different Gaayan- Shailies make the students feel that music has the power to move us because it can speak our deepest emotions through the moods it creates.
- CO4: Kanth sangeet students will study that Margi Music literally means "Music of the Path" and desi music refers to its components as Geet, Vadya and Nritya.
- CO5: Music vocal learners will be getting advantages of learning Hindustani Classical music to know about Gayakon ke Gun-Dosh.
- CO6: The role of music in national integration and contribution towards Indian music by music maestro will be very inspirational factors for music students.

CO7: Riyaz of slow and Dreul-Khayal of prescribed Ragas.

Semester-III

Paper: MV 23 Music Vocal

CO1: The very heart of Indian music is the Raga-which refers to the melody and Tala-which refers to the rhythm. Classical ragas of Indian music are many and each has its distinctive qualities.

CO2: Dhrupad, Dhamar, Khyal and Thumri gayan shaillies singing involves single-minded devotion and lifelong commitment. Students will learn to sing ragas and gayan.

CO3: One of the most favourite things about the Hindustani classical music is that you learnt it very much the way you would learn a language like placement of swaras on shruti by music scholars and various definitions.

CO4: The tradition of Indian Classical Music is an oral one. It is taught directly by the Guru like Ustad Bade Ghulam Ali Khan and pandit Mallikarjun Mansoor to their disciple (guru shishya parampara).

CO5: Role of sentence promoted educational cultural aspects of music among classical music beneficiaries.

Semester-IV

Paper: MV 24 Music Vocal

CO1: Raaga means "Color" or "Passion". In the classical music of India, a melodic framework for improvisation and composition Four Ragas in this semester is based on a scale with a given set of notes, a typical order in which they appear in melodies and characteristic musical motifs.

CO2: Tappa and various gaayan shailies will be learned to sing gram, murchhana, tanpura, sahayak-naad etc with definitions.

CO3: Students will do practically how swars on shrutis were placed by pandit pundrik vitthal and ramamatya.

CO4: Students will learn to sing vilambit and dreut-khyala in prescribed ragas.

CO5: Ability to demonstrate various talas with reciting bils by hand in layakartey.

CO6: Ability to play syllabus taal on tablas.

CO7: Contribution towards music by music maestros.

CO8: History of music in medieval-period will enrich the student's aptitude for historical value of Indian classical music.

Semester-V

Paper: MV 25 Music Vocal

CO1: Students will learn to riyaz the prescribed ragas of this semester from performance point of view with rasa theory. The basic component of ragas can be written down in the form of a scale (in some cases differing in ascent and descent). By using only these notes, by emphasizing certain degrees of the scales and by going from note to note in ways characteristic to the Raga. The students set out to create a mood or atmosphere (Rasa) that is unique to the raga in question. (Set to different talas also).

CO2: When students learn a new raga, they notate a few basic melodic phrases, patterns and simple compositions in that raga so that they can be recall them later.

CO3: Students will study that music is an abstract fine art because it is individual's emotions, expressions and creativity.

CO4: Students will know about teaching through Ghrana (the place where musical ideology originated) and education institutions by music scholars.

CO5: Music learners will study above-time theories of raga which has properties to enhance emotional impact that classical vocal can bring in.

CO6: Indian classical music has two foundational elements, raga and taal occupies an important position in the Indian system of classical music.

Semester-VI

Paper: MV 26 Music Vocal

CO1: Students will feel by singing prescribed ragas that each raga traditionally has an emotional significance and symbolic association such as with season time and mood.

- CO2: Rhyme/ talas plays an important role in classical music giving texture, sensuality and a sense of purpose to melody by listening the recording/live performances of music scholars.
- CO3: Historical survey of Indian Music from 17 to 19 century.
- CO4: Students will be benefitted to know how voice culture covers the all voice related things like voice flexibility, ensures control of breath, uniformity, clarity in voice etc.
- CO5: Elementary knowledge of the folk music of Haryana and Punjab.
- CO6: Classification of instruments during vedic, Medieval and modern period.
- CO7: Riyaz and Vilambit and dreut khyals of prescribed ragas and ability to play syllabus talas on hands and table also.

B.A. Music Instrumental

Course Outcomes (COs)

Semester-I

Paper: MI 21 Music Instrumental

- CO1: पाठ्यक्रम में दिए गए रागों के भावपक्ष व स्वरूप की ऐतिहासिक जानकारी छात्राओं को देना ताकि वे रागों का अभ्यास भावपूर्ण ढंग से कर सकें।
- CO2: सुप्रसिद्ध सितार वादकों की जीवन शैली तथा उसके सांगीतिक योगदान की पूर्ण जानकारी विद्यार्थियों को देना ताकि विद्यार्थी अलग-अलग घरानेदार वादन-शैली की विशेषता ग्रहण कर सकें।
- CO3: विद्यार्थियों को वैदिक काल से 12वीं शताब्दी के संगीत की ऐतिहासिक जानकारी प्रदान करना ताकि वे उसके महत्व को समझ सकें।
- CO4: सितार की बनावट व उसके बजाने की तकनीक के बारे में छात्राओं को जानकारी देना ताकि वे साज का सुरमय आनंद ले सकें।
- CO5: छात्राओं को लोक संगीत व शास्त्रीय संगीत के अन्तः सम्बंध को पूर्णतया समझाना जिसका शास्त्रीय-संगीत के प्रचार-प्रसार में विशेष महत्व है।
- CO6: विद्यार्थियों को संगीत, नाद, श्रुति, स्वर, सप्तक, गत, झाला, तोड़ा, राग, थाट आदि की परिभाषा को बखूबी समझाना ताकि वे अपनी वादन-शैली में इसका प्रयोग कर सकें।

CO7: छात्राओं को स्वरलिपि का महत्व बताते हुए राग यमन, अल्हैया बिलावल, भोपाली की रजाखानी गत, मसीतखानी गत को बजानासिखाना ताकि वे रागों के भावपक्ष का अनुभव कर सकें।

Semester-II

Paper: MI 22 Music Instrumental

CO1: विद्यार्थियों ने पाठ्यक्रम में दिए गए रागों के स्वर व (लगने वाले स्वर इत्यादि) के विषय में जानकारी प्रदान करना ताकि वे रागों का समुचित अभ्यास कर सकें।

CO2: भारतीय संगीत में रागस्वर के चलन के आधार पर गायन व वादन का समय निर्धारण किया गया है। छात्राओं को इस विषय में जानकारी प्रदान करना क्योंकि संगीत के प्रस्तुतीकरण में समय-सिद्धांत का बहुत महत्व है।

CO3: छात्राओं को सूत घसीट, जमजमा, नायक-नायकी, वादी-संवादी विवादी की परिभाषाएं समझाना।

CO4: छात्राओं को सितार वादकों के गुण-दोषों के बारे में बताना ताकि वे एक अच्छे सितार वादक/वादिका बनने का प्रयास कर सकें।

CO5: विद्यार्थियों को वाद्यों की बनावट, आकार व उनकी वादन शैली के बारे में विस्तृत जानकारी देना ताकि वे अपने वाद्यों की ध्वन्यात्मक गुणात्मकता को समझ सकें।

CO6: विद्यार्थियों को संगीत कलाकारों की जीवनशैली व उनके सांगीतिक योगदान के विषय में समझाना ताकि वे उनके सांगीतिक रियाज एवं तप से प्रभावित हो सकें।

CO7: जनसंपर्क आदि माध्यमों का भारतीय शास्त्रीय संगीत की उन्नति में क्या भूमिका है, इसकी पूर्ण जानकारी छात्राओं को देना ताकि विद्यार्थी इन माध्यमों का प्रयोग अपने वादन को स्वरीय बनाने में कर सकें।

CO8: छात्राओं को तालों की संरचना व लयबद्धता के विषय में पूर्णरूप से जानकारी देना क्योंकि ताल एवं लय संगीत के महत्वपूर्ण अंग हैं।

Semester-III

Paper: MI 23 Music Instrumental

CO1: पाठ्यक्रम में वर्णित रागों के परिचय एवं ऐतिहासिक स्वरूप की विस्तृत जानकारी छात्राओं को देना ताकि वे रागों के समुचित स्वरूप को समझ सकें।

- CO2: छात्राओं को स्वरलिपि का महत्व बताते हुए वाद्य पर बजाना सिखाया ताकि वे सुरों को सुनकर समझ सकें।
- CO3: छात्राओं को तालों की संरचना व लयबद्धता के विषय में बेखूबी समझाना ताकि विद्यार्थियों का वादन बाल-पक्ष की दृष्टि से परिपक्व हो सके।
- CO4: ख्याति प्राप्त सितार वादकों की जीवनशैली व विभिन्न स्तरों पर आधारित कार्यक्रमों में इनकी वादन की विशिष्टताओं के विषय में समझाना ताकि विद्यार्थी गुणात्मक वादन-शैली की ओर अग्रसर हो सकें।
- CO5: छात्राओं को सितार वादन की विभिन्न शैलियों के बारे में विस्तृत जानकारी देना क्योंकि शैलियों के आधार पर ही विद्यार्थी सितार-वादन की तकनीकियों को अपनाएंगे।
- CO6: स्वयंभूनाद(स्वयं से उत्पन्न नाद) के बारे में छात्राओं को बेखूबी समझाना ताकि रागों में छात्रगण स्वयंभूनाद का अनुभव कर सकें।
- CO7: विद्यार्थियों को परमेल प्रवेशक राग, अल्लाफ-बहुत्व मसीतखानी गत, रजाखानी गत, ग्राम आदि संगीतात्मक विषयों के बारे में समझाना ताकि वे संगीत के शास्त्र-पक्ष से अवगत हो सकें।

Semester-IV

Paper: MI 24 Music Instrumental

- CO1: पाठ्यक्रम में वर्णित राघव के स्वरूप व (लगने वाले स्वर इत्यादि) के विषय में जानकारी देना ताकि वे रागों का समुचित ढंग से अभ्यास कर सकें।
- CO2: स्वरलिपि का महत्व बताते हुए राग शुद्ध कल्याण, खमाज केदार का विस्तृत परिचय बताना ताकि वे रागों के शास्त्रपक्ष को समझ सकें एवं रगानुसार (अपने वादन का अभ्यास करें)।
- CO3: छात्राओं को तालों की संरचना व लयबद्धता के विषय में पूर्णरूप से जानकारी प्रदान करना क्योंकि संगीत-गायन-वादन के ताल अभिन्न अंग है।
- CO4: ख्याति प्राप्त कलाकारों की जीवनशैली व सांगीतिक योगदान की जानकारी छात्राओं को देना ताकि वे उनकी साधना वे तप से प्रभावित हो सकें।

- CO5: छात्राओं ने सरोद, तबला, वायलिन आदि वाद्यों की बनावट एवं वादन शैली की विस्तृत जानकारी प्रदान करना ताकि वे वाद्यों की ध्वन्यात्मक गुणात्मकता को समझ सकें तथा अपने वादन का प्रभावशाली बना सकें।
- CO6: आर्वीभाव-तिरोभाव, संधि प्रकाश राग, मूर्च्छना, अमीरखानी गत आदि संगीतात्मक विषयों के बारे में छात्राओं को अवगत कराना ताकि इन परिभाषाओं की महत्ता के आधार पर छात्राएं अपने वादन को परिष्कृत कर सकें।
- CO7: विद्यार्थियों को आधुनिक काल में संगीत की शैक्षणिक एवं सांस्कृतिक उन्नति में विज्ञान की भूमिका के विषय में विस्तार समझाना ताकि वे अपने अभ्यास में उसका लाभ उठा सकें।
- CO8: मध्यकालीन संगीत के इतिहास की महत्ता को विद्यार्थियों को भलीभांति समझाना ताकि वे उस काल में हुए सांगीतिक विकास को समझ सकें एवं संगीत वादन के उत्तरोत्तर विकास का लाभ उठा सकें।

Semester-V

Paper: MI 25 Music Instrumental

- CO1: पाठ्यक्रम में दिए गए रागों के ऐतिहासिक एवं शास्त्रीय परिचय की जानकारी छात्राओं को देना ताकि वे रागों के समुचित स्वरूप को समझ सकें।
- CO2: स्वरलिपि का महत्व बताते हुए सितार वाद्य पर रागों को बजाना ताकि वे स्वरों को सुनकर समझ सकें।
- CO3: छात्राओं को तालों की संरचना व लयबद्धता के विषय में पूर्णरूप से जानकारी देना क्योंकि संगीत में तालसयबद्धता की गायन-वादन की पूर्णता है।
- CO4: अंतर्राष्ट्रीय ख्याति प्राप्त सितार वादक कलाकारों के संगीत जगत को दिए गए योगदान के विषय में छात्राओं को विस्तृत जानकारी देना ताकि वे उनके वादन की गुणात्मकता का अपने अभ्यास में प्रयोग कर सकें।
- CO5: विद्यार्थियों ने स्वरलिपि पद्धति के उद्भव एवं विकास के बारे में विस्तार से समझाना ताकि वे अपने अभ्यास में उसका लाभ उठा सकें।
- CO6: भारतीय वाद्यवृंद की उत्पत्ति एवं विकास के बारे में विद्यार्थियों को भलीभांति समझाना ताकि विद्यार्थीगण विभिन्न भारतीय वाद्यों का वादन कर सकें एवं भारतीय वाद्यवृंद में भाग ले सकें।

CO7: अंतरराष्ट्रीय सांस्कृतिक-आदान-प्रदान में संगीत की भूमिका के विषय में छात्राओं को पूर्ण जानकारी देना ताकि वे शास्त्रीय संगीतोल्लति में इसके महत्व से लाभान्वित हो सके।

Semester-VI

Paper: MI 26 Music Instrumental

CO1: पाठ्यक्रम में वर्णित रागों के परिचय एवं ऐतिहासिक स्वरूप की विस्तृत जानकारी छात्राओं को देना ताकि वे रागों का अभ्यास भावानुसार कर सकें।

CO2: सुप्रसिद्ध सितार वादकों की जीवनशैली व विभिन्न स्तरों पर आयोजित कार्यक्रमों में वादन की विशिष्टताओं के विषय में बताना ताकि वे उनकी वादन शैली से प्रभावित हो सकें तथा अपने सितार-वादन के अभ्यास को आगे बढ़ा सकें।

CO3: छात्राओं को स्वरलिपि का महत्व बताते हुए राग कामोद, बिहाग, देशकार, बहार, भीमप्लासी का विस्तृत परिचय बताना जिससे वे रागों के रासपक्ष को समझ सकें एवं रागों का प्रस्तुतीकरण अधिक अभ्यास पूर्ण बना सकें।

CO4: छात्राओं को तारों की संरचना व लयबद्धता के विषय में बखूबी यथोचित जानकारी देना क्योंकि राग वादन में ताल-लयबद्धता अनिवार्य अंग के रूप में प्रस्तुत होती है।

CO5: शास्त्रीय संगीत व इलेक्ट्रॉनिक मीडिया के विषय में छात्राओं को पूर्णरूपेण जानकारी देना ताकि वे वर्तमान समय में इसके महत्व को समझ सकें एवं अपने गायन-वादन में इसका लाभ उठा सकें।

CO6: विद्यार्थियों को 17वीं शताब्दी से 19वीं शताब्दी के दौरान भारतीय शास्त्रीय संगीत के विकास की जानकारी देना ताकि वे संगीत के ऐतिहासिक महत्व को समझ सकें, अपने शास्त्र-पक्ष को समृद्ध बना सकें।

CO7: छात्राओं को स्वरलिपि पद्धति की महत्ता बताते हुए इसके गुण व अवगुणों की भी विस्तृत जानकारी देना ताकि विद्यार्थी अपने वादन में केवल इसका यथोचित प्रयोग ही करें।

B.A. Computer Awareness

Course Outcomes (COs)

Semester-II

Paper: level I Computer Awareness

CO1: This course will give an understanding of windows operating system, control panel, desktop, applications, files and folders in computer.

- CO2: This would be able to use word processor, create and edit document, formatting, advance features of MS word, charts etc.
- CO3: This would be able to use spread sheet, creating, editing and formatting spread sheet, and formula and functions, and creating charts in MS excel.
- CO4: This would be able to use power point presentation, creating, manipulating and enhancing slides, animations, and inserting different sound effects.
- CO5: At the end of this course, Students will be able to create emails, send and view emails, and send an attachment. Students will also understand the concept of internet, search engine and web browser.

B.A. Environment Studies

Course Outcomes (COs)

Paper: Environment Studies

Semester-II

- CO1: Course offered at UG level compulsory for all streams aim to shape the mind of students sensitive towards environment & their surroundings.
- CO2: Students learn how environment studies is a multi-disciplinary in nature & how it is connected to other branches of humanities, commerce & science.
- CO3: Students gain knowledge different natural resources, renewable & non-renewable resources, their utilization & deletion, ecosystems & their interaction with each other.
- CO4: Familiarity arises among students for biodiversity of flora and fauna and its conservation.
- CO5: Major social issues as pollution, global warming, green-house effect, water conservation draws the attention of students.
- CO6: Some other issues such population explosion Human rights, AIDS, drugs are also there to increase awareness among students.

Programme Outcomes (POs) for B.A.

After completing the graduation in the faculty of Arts the students have:

- PO1: Acquired the knowledge with facts and figures concerned with the subjects such as History, Political Science, Economics, Home Science, Psychology, Mathematics and Languages etc.
- PO2: Understood the basic concepts, fundamental principles and various theories in the above- mentioned subjects.
- PO3: Gained analytical ability by studying Mathematics, Economics and Psychology.
- PO4: Realized the importance of literature in terms of aesthetics, mental, moral and intellectual development of an individual by studying Hindi, English, Sanskrit and Punjabi languages.
- PO5: Gained ability to perform as soloists, ensemble members and chamber musicians at appropriate levels after graduating in Music (Vocal) and Music instrumental.
- PO6: Maintained a health enhancing level of fitness throughout the programme as well as to be able to collect and analyze personal fitness data after studying the subject Physical Education.
- PO7: Learnt family relations, community living, art, food, nutrition, clothing, textiles and home management by studying practical subjects Home Science.
-

Programme Specific Outcomes (PSOs) for B.A.

After completing the graduation in the faculty of Arts the students have:

PSO1: Appreciated that social issues are no longer permanent and largely depend on political and social changes.

PSO2: Become eligible for competitive exams for higher studies and job in private and public sector after graduation in Arts.

PSO3: Emerged as a multifaceted personality who is self-dependent; earning her own bread and butter and also creating opportunities to do so.

PSO4: Convinced herself that the study of literature and Social sciences are not only helpful to evolve better individual and better society but also helpful to make the life of an individual happier and more meaningful.

PSO5: Become efficient to contribute in the society by providing their skills and awareness of psychotherapy and home-making after studying practical i.e. Home Science and Psychology.

PSO6: Helped to demonstrate the understanding and use of public performance as a means for engaging communities, creating cultural awareness and providing ethical leadership.

PSO7: Written articles, novels, stories to spread the messages of equality, nationality, social harmony and other human values.

PSO8: Developed various communication skills such as reading, listening, speaking etc. which will be helpful in expressing ideas and views clearly and effectively.

COURSE OUTCOMES

Name of Programme: B.A. with Functional English

Semester: I

Paper: FE 21 Functional English

- CO1: Students will be able to understand Phonetics and Remedial grammar.
- CO2: In the first semester, students will learn IPA symbols in Phonetics. They will come to know how to transcribe the words into phonetics.
- CO3: Through the topic of speech mechanism, they learn how the sounds are produced with different organs of speech.
- CO4: Students are able to know correct pronunciation of words.
- CO5: Phonetics also enhances the vocabulary of the students.
- CO6: In the grammar section they learn the parts of speech, tag questions, difference between adverbs and adjectives etc.

Semester: II

Paper: FE 22 Functional English

- CO1: Students will be able to understand Phonetics and Remedial grammar.
- CO2: In the second semester students learn about Accent and Rhythm.
- CO3: Students also learn the pitch variation included in Intonation.
- CO4: Students are able to know the falling-rising tone in sentences.
- CO5: In the grammar section students learn about Tenses, Spotting Errors etc.
- CO6: Students also learn the stress marking on words.

Semester: III

Paper: FE 23 Functional English

- CO1: Through this course students will learn communication English.
- CO2: This course develops writing skills in students.

CO3: This course is aimed at an understanding of the development of the English language and the structure of modern English.

CO4: This subject familiarizes the students with the application of language in various aspect of our lives.

Semester: IV

Paper: FE 24 Functional English

PSO5: Equipped with great command over all macro skills in English which make them use English accurately, appropriately and fluently.

DAYANAND MAHILA MAHAVIDYALAYA

COURSE OUTCOMES

NAME OF PROGRAMME: B.COM (GENERAL AND SFS)

Semester- I

Paper: BC 101 Financial Accounting –I

CO1: It helps the students to understand Book-keeping, Accounting and Accountancy.

CO2: The students will understand purposes and functions of accounting.

CO3: The course will help the students to understand assets, liabilities, revenue items and capital items.

CO4: It also helps the students to gain practical knowledge of capital expenditures, revenue expenditures and incomes.

Paper: BC 102 Micro Economics

CO1: Students get to know about micro economics concepts of consumer demand and consumer behaviour.

CO2: Students understand about various types of markets and competitions therein.

CO3: They know about market imperfections and also about the strategies in these kinds of markets by the firms.

CO4: Students also get acquainted with the concept of 'Cost' and 'Revenue' aspects.

Paper: BC 103 Principles of Business Management

CO1: Management skills have emerged as the most important skills for enhancing the quality of life of people in modern era.

CO2: To develop an understanding of planning, organizing, staffing and decision-making aspects.

CO3: After being familiar with management concepts, students get to deliver better results in their professional life.

Paper: BC 104 Computer Applications in Business

CO1: Familiar with Computer, its characteristics block diagram of computer.

- CO2: Familiar with CPU memory and organization.
- CO3: Understand the concept of hardware, software and how do they work.
- CO4: Understand the concept of network basics, its topology types, media etc.
- CO5: Gain the knowledge of MS-Word, Excel and Power point presentation.

Paper: BC 105 Business Mathematics-I

- CO1: Students will understand the use of matrices with various operations i.e. addition, subtraction, multiplication by scalar, multiplication of matrices, transpose of matrices etc., determinants, inverse of matrix using various elementary operations that is used in maintenance of accounts, Tally etc.
- CO2: Students will learn to solve the system of linear equations by different methods that are usable in simple business problems.
- CO3: Students will learn to compute simple and compound interest using different formulas & investigate bank facilities.
- CO4: Students will learn the concept of annuity, future value of annuity, annuity due using table, present value of annuity, which is useful in EMI calculations, finance, management etc.
- CO5: Students will understand the concept of differentiation that will be usable in cost optimization related problems of demand & supply problems.
- CO6: Concept of series solving of arithmetic progression and geometric progression will help students in competitive exams.

Paper: BC 106 Business Communication

- CO1: This course provides knowledge to students about what are the different types of communications and how they are being used in business organizations.
- CO2: This course helps the students in self-development by creating positive attitude and by SWOT Analysis.
- CO3: This course provides knowledge about the interviewing skills; resume writing skills and business letter writing skills.
- CO4: This course fulfils the basic requirements like knowledge of E-mailing and Internet.

CO5: This course enables the students to make good presentations by effectively utilizing verbal as well as non-verbal modes of communication.

Semester- II

Paper: BC 201 Financial Accounting –II

CO1: It enables the students to gain further knowledge about hire purchase system and instalment payment system.

CO2: The course will enable students to acquire practical knowledge about branch accounts, foreign branches, dependent and independent branches.

CO3: To make the students aware about partnership and dissolution of partnership including Garner Vs Murray rule.

CO4: Students will be able to understand the treatment of goodwill and joint life policy on admission and death/retirement of partner.

Paper: BC 202 Macro Economics

CO1: To make the students learn how macro-economics principles are useful in making various policies by government.

CO2: Students acquire knowledge about the concept of National Income, output and employment.

CO3: Acquire the necessary quantitative skills used in economic analysis.

CO4: This course will help the students understanding how macroeconomic stability is achieved through monetary and fiscal policy.

Paper: BC 203 Fundamentals of Marketing

CO1: After completing this course the students will understand the concept of advertising and how advertising affects the buying habit of consumers.

CO2: The course enables the students to understand about the product designing, packaging, pricing and its promotion process.

CO3: To make aware the students how a product passes from one stage to another stage.

CO4: To create awareness among students about market and marketing.

CO5: After completing the course the students shall be able to understand the environmental conditions effecting marketing decisions of a firm.

Paper: BC 204 E-Commerce

CO1: Students will be able to understand the basic concepts of internet including applications, uses and services of internet.

CO2: Enhances the knowledge of students to understand the concepts of data, information and information system.

CO3: Various types of information system that are useful in business are introduced to the students.

CO4: Students get familiar with e-commerce and its various application services including the various e-commerce models.

CO5: Students are aware about the various security issues in the e-commerce.

CO6: Introduces the concept of M-commerce.

CO7: Students are able to use various on-line sources for research & e-governance initiations.

Paper: BC 205 Business Mathematics -II

CO1: Students will learn the concept of arrangement of letters & numbers in the code exercise to come up with a no. of possible permutation, all possible permutations, combinations that are used in event management.

CO2: Students will learn the concept of expansion of binomial raised to any power.

CO3: Use of graphical representation of equations & inequations is helpful in optimization of business problems, diet problems, transportation problems, cost related problems etc.

CO4: Applications of mean, mode, median, frequency distributions, bar, histogram, pie diagrams, frequency curves are useful in data analysis.

Paper: BC 206 Business Environment of Haryana

- CO1: It will enable students to understand various internal as well as external factors affecting the business.
- CO2: Students will come to know about Haryana economy, its features and its state since inception its problems etc.
- CO3: It provides knowledge about different sources of agriculture credit.
- CO4: It makes clear the role of HSIIDC, HFC, HAFED, NABARD and HKUIB in our Haryana economy.
- CO5: It provides knowledge about Haryana Budget sources of Revenue and their Utilization.

Paper: Environment Studies

- CO1: Course offered at UG level compulsory for all streams, aim to shape the mind of students sensitive towards environment & their surroundings.
- CO2: Students learn how environment studies is a multi-disciplinary in nature & how it is connected to other branches of humanities, commerce & science.
- CO3: Students gain knowledge different natural resources, renewable & non-renewable resources, their utilization & deletion, ecosystems & their interaction with each other.
- CO4: Familiarity arises among students for biodiversity of flora and fauna and its conservation.
- CO5: Major social issues as pollution, global warming, green-house effect, water conservation draws the attention of students.
- CO6: Some other issues such population explosion Human rights, AIDS, drugs are also there to increase awareness among students.

Semester-III

Paper: BC 301 Corporate Accounting-I

- CO1: Through this course students will be able to understand the concept of issues of shares & debentures.

- CO2: Students will get understanding regarding redemption of shares & debentures.
- CO3: Students will get an exposure to the company final accounts.
- CO4: After successful completion, students will get to know about amalgamation & its types.
- CO5: Students will get to know how to deal with complex issues of Amalgamation & reconstruction.

Paper: BC 302 Business Statistics-I

- CO1: Provide help in enhancing the knowledge of students regarding quantitative models to solve the real-world problems in appropriate context.
- CO2: Enable the students to formulate correct, concise and complete mathematical proofs.
- CO3: Impart knowledge to student about mean, median and mode.
- CO4: Develop the ability to make effective use of professional level technology tools to support the study of statistics and mathematics.

Paper: BC 303 Business Law-I

- CO1: To impart basic knowledge of the provisions of the contract act 1872.
- CO2: To familiarize the students with practical aspects of discharge of the contract and its remedies.
- CO3: Students get to know about concept of consumer protection act 1986 and its different consumer's redressal forms.
- CO4: They know about the sales of goods act 1930, concept of unpaid seller, suits against buyer and seller etc.

Paper: BC 304 Company Law-I

- CO1: The students will be able to know about company and its various types.
- CO2: They become aware about the salient features of company act 2013 and its various amendments.
- CO3: Students will get the knowledge of promotion and incorporation of company and various legal documents required for its incorporation.

- CO4: They will come to know how prospectus is formed and how it can be scanned.
- CO5: They become aware about shares, debentures and stock and how shares can be converted into stocks.
- CO6: This course also enables students about the memorandum and article of association and its various components.

Paper: BC 305 Indian Financial System

- CO1: By studying Indian financial system, students will be able to understand financial system and importance of monetary policy and money market.
- CO2: To understand Indian financial system, components of money market are important. It would provide knowledge about financial instruments, capital market, Security and Exchange Board of India.
- CO3: To learn about debt market and security market will make students aware about economy.
- CO4: Functioning of RBI will be understood by studying credit control, credit creation and function of RBI.
- CO5: Banks play an important role in Indian Financial System. Students will study commercial banks, development banks, payment banks and E-banking.

Paper: BC 306(opt i) Rural Marketing

- CO1: It would enhance the knowledge of students regarding marketing strategies and rural pricing policies.
- CO2: It would encourage the students to think about the difference between urban market and rural market easily.
- CO3: Rural marketing would help the students to know about the consumer's behavior.
- CO4: Help the students in understanding the rural marketing environment and rural marketing mix.

Paper: BC 306(opt ii) Foreign Trade of India

- CO1: The course provides a deep understanding about the broad principles which tend to govern the flow of trade in goods, services and capital, both short term and long term at the global level.
- CO2: The content of the paper spread over different modules will greatly help to examine the impact of trade policies followed both at the national and international levels.
- CO3: The course provides understanding of INCOTERMS, International price quotations. The students will be aware about the financial institutions like WTO, World Bank and IMF.
- CO4: The course provides detail information regarding composition, direction, trends and Balance of Payment problems of India.

Semester- IV

Paper: BC 401 Corporate Accounting-II

- CO1: Students will be able to get knowledge regarding goodwill and its valuation.
- CO2: The course will help the students to get acquainted with accounting procedure of holding companies.
- CO3: Students will be able to understand the concept of accounting in Banking and Insurance companies.
- CO4: After studying, this course will make students to gain idea regarding liquidation and its accounting procedure.

Paper: BC 402 Business Statistics-II

- CO1: It will help the students in understanding the concept of probability and their use in daily life.
- CO2: Understanding of data collection and presentation in an effective manner through various types of analysis.
- CO3: Students enable to understand the concept of correlation and regression for a data of two variables.

CO4: The qualities such as observation, analytical and logical thinking, clarity of thoughts, qualitative and quantitative decision making are enhanced.

Paper: BC 403 Business Laws-II

CO1: To impart basic knowledge of the provision of the Negotiable Instruments Act, 1881.

CO2: Students get to know about the concepts of Indian Partnership Act, 1932 and its implementation in practical life.

CO3: To acknowledge the basic concepts of Information Technology Act, 2000.

CO4: After being familiar with Right of Information Act, 2005 and get acquainted with the procedure to fill the RTI forms.

CO5: Basic understanding of Limited Liability Partnership Act, 2008, Limited Liability Partners Relations and Liability.

Paper: BC 404 Company Law-II

CO1: The course enables students to understand the procedure of transfer and transmission of shares and debentures.

CO2: Students become also aware about the electronic sales and purchase of securities i.e. depository system and its working.

CO3: Students will get the knowledge of legal position, qualification, appointment, removal, powers and duties of directors.

CO4: They become able to know the Reconstruction and Amalgamation Procedure of companies.

CO5: This course also become aware the students about the winding up, its modes and consequences of winding up.

CO6: Including all above points students also become aware about the statutory, annual general and extra ordinary general meeting that are required in companies and quorum.

CO7: This course helps the students to understand the practicality of Theoretical concepts.

Paper: BC 405 Computerized Accounting System

CO1: Students will be able to learn about installation of Tally, Tally vault password and splitting company data.

CO2: To familiarize the students with practical aspects of computerized accounting.

CO3: To train the students in preparation of financial statements and reports by various voucher entries.

CO4: It enables the students to maintain payroll and computerized tax liability calculations.

CO5: It makes students ready with required skills for employability in the job market.

Paper: BC 406(opt i) Advertising

CO1: Students will be able to develop advertising plan and present and defined it persuasively.

CO2: Students will be able to evaluate the effectiveness of integrated advertising initiatives.

PSO5: This program inculcates among the students the sense of discipline, confidence, and communication skills required in the changed global scenario.

PSO6: This program develops entrepreneurial skills among students to start up their own ventures.

DAYANAND MAHILA MAHARAJA UNIVERSITY

COURSE OUTCOMES

Name of Programme: B. Com with Computer Applications

Semester-I

Paper: BC 101 Financial Accounting –I

- CO1: It helps the students to understand Book-keeping, Accounting and Accountancy.
- CO2: The students will understand purposes and functions of accounting.
- CO3: The course will help the students to understand assets, liabilities, revenue items and capital items.
- CO4: It also helps the students to gain practical knowledge of capital expenditures, revenue expenditures and incomes.

Paper: BC 102 Micro Economics

- CO1: Students get to know about micro economics concepts of consumer demand and consumer behaviour.
- CO2: Students understand about various types of markets and competitions therein.
- CO3: They know about market imperfections and also about the strategies in these kinds of markets by the firms.
- CO4: Students also get acquainted with the concept of 'Cost' and 'Revenue' aspects.

Paper: BC 103 Principles of Business Management

- CO1: Management skills have emerged as the most important skills for enhancing the quality of life of people in modern era.
- CO2: To develop an understanding of planning, organizing, staffing and decision-making aspects.
- CO3: After being familiar with management concepts, students get to deliver better results in their professional life.

Paper: BC 106 Business Communication

- CO1: This course provides knowledge to students about what are the different types of communications and how they are being used in business organizations.
- CO2: This course helps the students in self-development by creating positive attitude and by SWOT Analysis.

CO3: This course provides knowledge about the interviewing skills; resume writing skills and business letter writing skills.

CO4: This course fulfils the basic requirements like knowledge of E-mailing and Internet.

CO5: This course enables the students to make good presentations by effectively utilizing verbal as well as non-verbal modes of communication.

Paper: BC(VOC) 105 Computer Fundamentals & logical Organizations

CO1: Students understand, identify and analyse computer hardware, software and network components.

CO2: Students get familiar with the way to install the hardware and software in the system.

CO3: Students get familiar with different types of operating systems like Mac, DOS, Unix, Linux etc.

CO4: Students get familiar with memory and CPU Organization.

CO5: Students understand the concept of network, its topologies and media etc.

Paper: BC(VOC) 106 Business Data Processing & PC Software-I

CO1: Students get familiar with various data processing concepts and use of computer applications in business.

CO2: Students attain the knowledge of basics of computer pertaining to Microsoft Office.

CO3: Students understand the basic concept of RDBMS.

CO4: Student's practical knowledge is enhanced by working on various functions of Microsoft Word and Excel.

CO5: It helps the students to learn the basics of computer and it is useful for the students in long run.

Semester-II

Paper: BC 201 Financial Accounting –II

CO1: It enables the students to gain further knowledge about hire purchase system and instalment payment system.

CO2: The course will enable students to acquire practical knowledge about branch accounts, foreign branches, dependent and independent branches.

CO3: To make the students aware about partnership and dissolution of partnership including Garner Vs Murray rule.

CO4: Students will be able to understand the treatment of goodwill and joint life policy on admission and death/retirement of partner.

Paper: BC 202 Macro Economics

CO1: To make the students learn how macroeconomics principles are useful in making various policies by government.

CO2: Students acquire knowledge about the concept of National Income, output and employment.

CO3: Acquire the necessary quantitative skills used in economic analysis.

CO4: This course will help the students understanding how macroeconomic stability is achieved through monetary and fiscal policy.

Paper: BC 203 Fundamentals of Marketing

CO1: After completing this course the students will understand the concept of advertising and how advertising affects the buying habit of consumers.

CO2: The course enables the students to understand about the product designing, packaging, pricing and its promotion process.

CO3: To make aware the students how a product passes from one stage to another stage.

CO4: To create awareness among students about market and marketing.

CO5: After completing the course the students shall be able to understand the environmental conditions effecting marketing decisions of a firm.

Paper: BC 204 E-Commerce

CO1: Students will be able to understand the basic concepts of internet including applications, uses and services of internet.

CO2: Enhances the knowledge of students to understand the concepts of data, information and information system.

CO3: Various types of information system that are useful in business are introduced to the students.

CO4: Students get familiar with e-commerce and its various application services including the various e-commerce models.

CO5: Students are aware about the various security issues in the e-commerce.

CO6: Introduces the concept of M-e-commerce.

CO7: Students are able to use various on-line sources for research & e-governance initiations.

Paper: BC(VOC) 205 Programming in C

CO1: The course will help the students to understand the fundamentals of C Language and developing programs in C Language.

CO2: Students should be able to understand identifiers, keywords, variables, data types, expression and statements.

CO3: Students should be able to understand and use the arrays, functions, control statements, pointers, and structures in programs.

CO4: They should be able to implement different file handling operations and use different operators in C program

Paper: BC(VOC) 206 Business Data processing and PC Software-II

CO1: This course helps the student to prepare presentation and enhance their presentation skills.

CO2: The students will be able to understand the concept of Desktop publishing.

CO3: The students learn the basic concept of data analysis.

CO4: Students are able to understand the basic concepts of mobile applications.

Semester-III

Paper: BC 301 Corporate Accounting-I

CO1: Through this course students will be able to understand the concept of issues of shares & debentures.

- CO2: Students will get understanding regarding redemption of shares & debentures.
- CO3: Students will get an exposure to the company final accounts.
- CO4: After successful completion, students will get to know about amalgamation & its types.
- CO5: Students will get to know how to deal with complex issues of Amalgamation & reconstruction.

Paper: BC 302 Business Statistics-I

- CO1: Provide help in enhancing the knowledge of students regarding quantitative models to solve the real-world problems in appropriate context.
- CO2: Enable the students to formulate correct, concise and complete mathematical proofs.
- CO3: Impart knowledge to student about mean, median and mode.
- CO4: Develop the ability to make effective use of professional level technology tools to support the study of statistics and mathematics.

Paper: BC 303 Business Law-I

- CO1: To impart basic knowledge of the provisions of the contract act 1872.
- CO2: To familiarize the students with practical aspects of discharge of the contract and its remedies.
- CO3: Students get to know about concept of consumer protection act 1986 and its different consumer's redressal forms.
- CO4: They know about the sales of goods act 1930, concept of unpaid seller, suits against buyer and seller etc.

Paper: BC 304 Company Law-I

- CO1: The students will be able to know about company and its various types.
- CO2: They become aware about the salient features of company act 2013 and its various amendments.
- CO3: Students will get the knowledge of promotion and incorporation of company and various legal documents required for its incorporation.

- CO4: They will come to know how prospectus is formed and how it can be scanned.
- CO5: They become aware about shares, debentures and stock and how shares can be converted into stocks.
- CO6: This course also enables students about the memorandum and article of association and its various components.

Paper: BC(VOC) 305 Data Structure

- CO1: Understand the organization of data structure, concept like array, stack, linked list.
- CO2: Student should be able to implement the graphs, backtracking using stack and queues.
- CO3: Students will know how to use trees to maintain hierarchy of data, different operations implementation.
- CO4: Understand the concept of sorting and searching operation etc.

Paper: BC(VOC) 306 Fundamentals of Database Management System

- CO1: Understand the concept of DBMS and different between traditional file base system and DBMS and its applications.
- CO2: Identify the logical design of ER model and Relational model and other different types of models.
- CO3: Basic architecture (3-Tier) of DBMS and normalization concept.
- CO4: Recognize the basic of SQL and different languages like (DDL, DML, and DCL) and create queries using these languages.
- CO5: Understand the architecture of Oracle and different types of triggers, procedures, function, procedures used in PL/SQL.

Semester-IV

Paper: BC 401 Corporate Accounting-II

- CO1: Students will be able to get knowledge regarding goodwill and its valuation.
- CO2: The course will help the students to get acquainted with accounting procedure of holding companies.

CO3: Students will be able to understand the concept of accounting in Banking and Insurance companies.

CO4: After studying, this course will make students to gain idea regarding liquidation and its accounting procedure.

Paper: BC 402 Business Statistics-II

CO1: It will help the students in understanding the concept of probability and their use in daily life.

CO2: Understanding of data collection and presentation in an effective manner through various types of analysis.

CO3: Students enable to understand the concept of correlation and regression for a data of two variables.

CO4: The qualities such as observation, analytical and logical thinking, clarity of thoughts, qualitative and quantitative decision making are enhanced.

Paper: BC 403 Business Laws-II

CO1: To impart basic knowledge of the provision of the Negotiable Instruments Act, 1881.

CO2: Students get to know about the concepts of Indian Partnership Act, 1932 and its implementation in practical life.

CO3: To acknowledge the basic concepts of Information Technology Act, 2000.

CO4: After being familiar with Right of Information Act, 2005 and get acquainted with the procedure to fill the RTI forms.

CO5: Basic understanding of Limited Liability Partnership Act, 2008, Limited Liability Partners Relations and Liability.

Paper: BC 404 Company Law-II

CO1: The course enables students to understand the procedure of transfer and transmission of shares and debentures.

CO2: Students become also aware about the electronic sales and purchase of securities i.e. depository system and its working.

CO3: Students will get the knowledge of legal position, qualification, appointment, removal, powers and duties of directors.

CO4: They become able to know the Reconstruction and Amalgamation Procedure of companies.

CO5: This course also become aware the students about the winding up, its modes and consequences of winding up.

CO6: Including all above points students also become aware about the statutory, annual general and extra ordinary general meeting that are required in companies and quorum.

CO7: This course helps the students to understand the practicality of Theoretical concepts.

Paper: BC(VOC) 405 Programming in Java

CO1: Students will be able to understand the basic concepts of object-oriented programming.

CO2: Students will learn the concept using basic syntax of control statements and implement in programming.

CO3: Students will be able to identify classes, objects and find the solutions to a specific problem.

CO4: Students will be able to understand various components of graphical user Interface and layout managers.

Paper: BC (VOC) 406 Advanced Computer Applications

CO1: Students understands the concept of networking, types of networking, topologies and transmission media.

CO2: Students get familiar with the different browsers like Internet Explorer, Mozilla Firefox, Opera and Google chrome.

CO3: Students gain the knowledge of E-Commerce, on line purchasing and selling.

CO4: Students understand the concept of Electronic Payment system, E-Governance concept and examples.

Semester-V**Paper: BC 501 Cost Accounting**

- CO 1: This course enables the students to understand how cost of any product/service is determined under different costing method.
- CO 2: This makes the student learn how to calculate tends/ quotation prices.
- CO 3: Under this course students learn about the various ways and techniques to control as well as to reduce the cost.
- CO 4: This provides knowledge about ascertainment of profitability of products and services.
- CO 5: This will make students understand the importance of different incentive schemes of wage payments.

Paper: BC 502 Entrepreneurship Development

- CO 1: This course will enable students to develop/ initiate business idea and communicate the idea through a business plan.
- CO 2: The course describes about characteristics, qualities and pre-requisites of an efficient entrepreneur.
- CO 3: The course will enable students to develop/ prepare feasibility reports of new projects.
- CO 4: To make aware the students about government support, promotional agencies and incentives available for new enterprises.

Paper: BC 503 Income Tax I

- CO 1: Students will be able to define the basic concept of income tax and determined the residential status for tax implication.
- CO 2: To make student understand the computation of total income under five sources of income.
- CO 3: It enables the students to know about the income which does not become part of total income.
- CO 4: Students will learn the provision of clubbing and aggregation of income.

Paper: BC 504 Company Law - II

CO 1: Students will be able to know the procedure of transfer and transmission of share and debentures.

CO 2: They also get acquainted with the legal position of directors, qualification, appointment, removal, power, duties of directors.

CO 3: It helps the students to know the accounts of audit, borrowing, powers and debentures. And also, they become able to know the reconstruction and amalgamation.

CO 4: This course also benefited the students to become aware about the meetings and resolution and other necessary essentials for a valid meeting.

CO 5: It also helps students to understand the procedure of merger, acquisition and winding up of company.

Paper: BC (VOC)-505 Web Technology

CO1: Student will be able to use the html programming language.

CO2: Students will be able to resolve written HTML Codes.

CO3: Students will be able to use design programmes.

CO4: Students can design Web sites.

CO5: Students will be able to manage things at one place, like Management of various options in one Web Site.

Paper: BC (VOC) 506 System Analysis and Design

CO1: Students understand the concept of system and SDLC (Software development life cycle)

CO2: Students get familiar with the types of system.

CO3: Students will know how to draw data flow diagrams.

CO4: Students will be able to draw data dictionary, flow charts, decision tables, form design etc.

CO5: Students understand the concept of testing, operation and maintenance.

Semester-VI**Paper: BC 601 Management Accounting**

- CO1: This course will make the students to understand management accounting for decision making purpose.
- CO2: This will teach how reporting is done at all three levels of management.
- CO3: This will provide knowledge about the ways of formulation of budgets.
- CO4: This enables to understand the concept of break-even-point and its use to increase the profitability of business.
- CO5: This course teaches the method to identify the variances between Actual and Standards so that these can be removed on time.

Paper: BC 602 Auditing

- CO1: This course helps students to be familiar with the audit process of an organization or a company.
- CO2: The purpose of this course is to provide students with a thorough grounding regarding examining the books of accounts and other related documents of an organization.
- CO3: Students will be able to describe the different types of audit and compare different types of audit easily.
- CO4: Encourage the students to apply the code of ethics for professional accountants in undertaking audit process.

Paper: BC 603 Income Tax-II

- CO1: Students will be able to know about the deduction u/s 80C to 80U for planning of tax in legal manner.
- CO2: It enables the students to compute and assess the total income of individual, HUF and firm.
- CO3: Students will develop an understanding of various amendments made from time to time in finance Act.
- CO4: Students will get the knowledge about various ITR forms and how to file it.

CO5: Understand the power of Taxation authorities and assessment types.

CO6: After completing this course, the students will know about advance tax, Appeal and Revision, Penalties and Prosecutions.

Paper: BC 604 Security Market Operations

CO 1: The course will help the students in building career in Stock market/ broking houses. It aims at providing the different components of financial system and their role. Students will be acquainted with the recent developments in the Indian Financial System.

CO 2: The Course aims at developing an understanding of the changing investment scenario in general and Indian Capital Market in particular with reference to availability of various financial products and operations of stock exchanges (BSE and NSE).

CO 3: Students will be acquainted with the methods of issuing shares and role of intermediaries in the primary market.

CO 4: Students will be able to understand the trading mechanism in the stock market and various types of derivatives.

Paper: BC (VOC) 605 Social Networking & Data Analytics

CO1: Students will learn how to make use of social media as well as how to promote any business on social media.

CO2: How they can organize, share as well as access information on social network.

CO3: Various concerns like-

- a) How they can make the information protected.
- b) Rules and Regulations regarding usage of social media.
- c) Legislation related to social network.

CO4: Students will learn the concept of big data, HADOOP, how they can handle the big data using various tools.

CO5: Various concepts of data warehousing will also be taught, and how some meaningful information can be gain from data using various methods.

Paper: BC (VOC)-606 Enterprise Resource Planning (ERP)

CO1: Students will be able to demonstrate a good understanding of basic issues of Enterprise System.

CO2: Students will be able to know the challenges associated with implementing Enterprise system.

CO3: They will able work independently and in a group.

CO4: Students come to know common enterprise system's scope.

DAYANAND MAHILA MAHAVIDYALAYA

Programme Outcomes (POs) for B. Com (Vocational) Computer Applications

- PO1: Commerce with computer application gives a deeper understanding of commerce and information technology, thereby enabling the students to pursue careers in either of the two fast growing areas i.e. IT industry, Commerce and Financial sector.
- PO2: This programme could provide well trained professionals for the technology and allied industries to meet well trained manpower requirements.
- PO3: Students will develop skills in various aspects of information technology i.e. software updation, Programme developers, BPO, Software testing, Web designing, graphic designing, animation etc.
- PO4: This programme will help the students to take up responsibilities in production, testing, designing and marketing in the information technologies and contribute for the growth of industry.
- PO5: As a current scenario of corporate Sector has a major shift in paradigm where in the need of Computer application has become increasingly high. It helps students to get well-adjusted with the changed Scenario at global level.
-

Programme Specific Outcomes (PSOs) for B. Com (Vocational) Computer Applications

After completing B. Com with Computer Application.

PSO1: Students will understand, analyse and develop software programmes in the areas related to system software, Multimedia, Web design, application programme, database, graphics and networking for efficient design of technology of varying complexity.

PSO2: To develop the skills of applying concepts and techniques used in commerce.

PSO3: To enable the students to pursue careers in either of the two fast growing areas i.e. IT Industry, Commerce, Marketing and Financial Sector.

PSO4: This programme enables students to use effective technology for audio-video Presentations appropriately i.e. Power Point Slides, Posters, handouts and transparencies in oral presentations.

PSO5: This programme will enrich students with Communication skills, ethical values, team work, Professional and leadership skills.

PSO6: This programme enables students to pursue research in their chosen areas.

COURSE OUTCOMES

Name of Programme: B.Sc. (Non-Medical)

Chemistry

Semester – I

Paper: CH 101 Inorganic Chemistry

Inorganic Chemistry deals with synthesis and behaviour of inorganic and organic metallic compounds. From this course students will have

CO 1: Understanding about structure of atom and particles constituting it.

CO 2: Understanding about periodic table and placement of element according to their unique properties.

CO 3: To understand concept of bonding, various theories of bonding, structure and geometry of different compounds.

CO 4: To develop a concept of ionic bonding in compounds, their properties and structure.

Paper: CH 102 Physical Chemistry

Physical chemistry deals with study of concepts of energy thermodynamics, equilibrium. Upon successful completion of this course, students will be able to

CO 1: Understand different state of matter and interactions existing between their particulates.

CO 2: Understand effect of temperature, pressure and volume among states of matter.

CO 3: Understanding of various physical properties of liquid such as viscosity, surface tension, vapour pressure and their practical applications.

CO 4: To inculcate the numerical ability.

Paper CH 103 Organic Chemistry

Organic chemistry is the scientific study of structure, reactions of organic compounds. By the end of this course, students will:

CO 1: Understand different kinds of bonds existing in organic compound.

CO 2: Naming of compounds to IUPAC nomenclature.

CO 3: Recognize and draw constitutional isomers, stereoisomers, enantiomers, diastereomers, racemix, mixture and meso compounds.

CO 4: To understand concept of reactant, reagents and different types of reaction.

Semester – II

Paper: CH 104 Inorganic Chemistry

This course will benefit the students in the following ways:

CO 1: To understand the concept of hydrogen bonding, vanderwaal's, metallic bond and semi- conductors.

CO 2: To clear why noble gases are low chemical reactivity, their late discovery.

CO 3: To understand about concept of diagonal relationship, anomalous behavior of elements.

CO 4: To study physical and chemical trends of s-block and p-block element.

Paper: CH 105 Physical Chemistry

CO 1: Understand that every reaction has a unique time of occurrence due to the involvement of different chemical species, concept about half life.

CO 2: Enhance their numerical ability of solving numerical.

CO 3: Concept of electrochemistry, conductance, resistance.

CO 4: Correlate factor of acidity, basicity with pH , pK_a , buffer action, buffer solution.

Paper: CH 106 Physical Chemistry

Following outcomes are expected from this course:

CO 1: Student will be able to differentiate between the aromatic, anti-aromatic and non-compounds.

CO 2: To understand basic difference between alkyl and aryl compounds.

CO 3: To clear concept about various reactions of alkenes, alkynes.

CO 4: To understand about reactivity, structure and hybridization of alkenes, alkynes.

Paper: CH 107 Practical

Upon successful completion of this course, students will be able to:

CO 1: Able to design, carryout, record and analyze the results of chemical experiments.

CO 2: will be able to titrate different mixtures.

CO 3: Understand concept of normality, molarity and molality and how to make solution of different concentration.

CO 4: Acquire habit of working safely with the chemicals and handling of equipments.

CO 5: Design experiments on parameters of viscosity, surface tension, specific refractivity.

Semester – III

Paper: CH 201 Inorganic Chemistry Theory

CO 1: Students will have the ability to demonstrate knowledge and understanding of essential facts, concepts and principles of inorganic chemistry.

CO 2: Students will be able to relate the basic difference amongst transition metals. Metal complexes cover a wide applicability in quantification of analysis and metal extraction.

CO 3: Students will be able to know about spectral properties of different inorganic compound based on their electronic properties.

CO 4: Students will come to know about the urge of development of co-ordination chemistry and its integration with d-block element.

CO 5: Basic nature of solvent and how different solvent show different reactions is all that students will understand.

Paper: CH 202 Physical Chemistry Theory

CO 1: Students will understand the concept of entropy and how the whole universe is related to it and how it affects other properties.

CO 2: Students will learn about the relationship between basic concept of thermodynamics and everyday world. They will also learn how the stability of whole universe is affected with different laws of thermodynamics.

CO 3: Students will get the knowledge about basic difference between path and state functions.

CO 4: Students will be able to know the importance of equilibria and how various types of equilibrium are different by various external parameters.

CO 5: Students will learn how to calculate the thermal efficiency of heat energies and how problems are solved which are based on laws of thermodynamics.

CO 6: Students will determine Nernst distribution law and they can relate it to various factor causing its deviation.

Paper: CH 203 Organic Chemistry Theory

CO 1: Students will inculcate the knowledge about alcohols and phenols and about their reactivity.

CO 2: Students will understand about the epoxides and their importance in industrial chemistry.

CO 3: Students will get a thorough knowledge about the basic concept of UV spectroscopy and how it can be used in organic chemistry for the identification of type of electronic transitions, reason for the colour of compounds, their stability. They will also come to know about the calculation of λ_{\max} by Woodward Fieser rules.

CO 4: Students will learn the importance and application of UV spectroscopy in structural determination of organic compounds.

CO 5: Students will come to know about the carboxylic acids, their properties, chemical reactivity. They will also learn the stability of acyl derivatives.

Semester – IV

Paper: CH 204 Inorganic Chemistry Theory

CO 1: Students will be able to know about the chemical and physical properties of f-block elements including lanthanides and actinides specifically reasoning for anomalous electronic configuration.

CO 2: Students will be able to differentiate between acidic and basic radicals and how they can be further useful in research as well as day to day life.

CO 3: Enables to individuate qualitative analysis from quantitative analysis.

CO 4: Students will understand about different theories of precipitation and how they are unique from each other.

Paper: CH 205 Physical Chemistry Theory

CO 1: Students will inculcate knowledge about the advance domain of thermodynamics.

CO 2: Students will understand second law of thermodynamics and its reaction with entropy.

CO 3: Students will learn how to apply third law in calculating entropy for various phases of matter and pure crystalline solid.

CO 4: Students will conceptualize the concept of work function, Gibb's energy and their significance for criteria of spontaneous reactions.

CO 5: Students will acquire knowledge about electro chemistry, various electrodes and their reactions, cell EMF and its applications in solubility product and potentiometric titrations.

Paper: CH 206 Organic Chemistry Theory

CO 1: Enables to understand the concept of IR spectroscopy and its applications in everyday life.

CO 2: Enables to familiarize with the amines, their preparation, reactions and comparison between primary, secondary and tertiary amines basicity.

CO 3: Students will be able to know about diazonium salt and their applications.

CO 4: Students will inculcate the understanding of aldehydes and ketones, their reactions comparison and mechanisms of some name reactions and nucleophilic addition reactions.

Paper: CH 207 Practical

CO 1: Experimentation enhances the skills of managing resources, time and team work. Students will be able to function as a member of an interdisciplinary problem-solving team.

CO 2: Students will get skilled to perform gravimetric analysis efficiently.

CO 3: Students will be able to figure out different organic compounds.

- CO 4: Students will be able to detect different functional groups, extra elements in the organic compound.
- CO 5: Enables to handle the apparatus used in calorimetric experiments and perform them accurately.
- CO 6: Students will be able to perform some inorganic preparation.
- CO 7: Enables to verify Beer's law through colorimetry.
- CO 8: Students will be able to conceptualize distribution law experimentally.

Semester V

Paper: CH 301 Inorganic Chemistry Theory

- CO 1: Students will come to know about the limitations of Valence Bond Theory (VBT) and they will be able to have an idea about crystal field theory (CFT).
- CO 2: Students will understand CFT for both tetrahedral and octahedral complexes.
- CO 3: Enables to have detailed knowledge about the magnetic and electronic properties of transition metal complexes.
- CO 4: Students will be able to understand the concept of stability in metal complexes governed by kinetic and thermodynamic parameter.

Paper: CH 302 Physical Chemistry Theory

- CO 1: Students will understand the concept of quantum mechanics and limitations of classical mechanics.
- CO 2: Students will acquire knowledge about operators in quantum mechanics. They will also learn postulate, wave functions, expectation values and probabilities for different system.
- CO 3: Students will gain knowledge about spectral information.
- CO 4: Enables to understand molecular spectroscopy, description of vibrational, rotational and Raman spectra thoroughly and their role in research.
- CO 5: Enables to conceptualize molecular structure, physical properties, dipole moment and various types of magnetism.

Paper: CH 303 Organic Chemistry Theory

- CO 1: Students will inculcate the knowledge of principle of NMR spectroscopy, detailed description and applications of NMR spectroscopy in determining the structure of organic compounds.
- CO 2: Students will be able to classify different carbohydrates based on their structure and positional composition.
- CO 3: Students will acquire knowledge about the nature of metal carbon bond present in organic compounds.
- CO 4: Enables them to learn about the organo metallic reagents like organolithium, organozinc and organomagnesium reagents and their applications.

Semester – VI**Paper: CH 304 Inorganic Chemistry Theory**

- CO 1: Students will be able to differentiate between acids and bases on the basis of different concepts.
- CO 2: Students will be able to cater their theoretical knowledge of acid-base into practical world.
- CO 3: Students will have an insight idea of organo metallic reagents in inorganic chemistry and their applications.
- CO 4: Students will be able to know about the bioinorganic chemistry. They will learn about the roles of different metal ions in various physiological and biological processes.
- CO 5: Students will acquire knowledge about the compounds of silicon and phosphorus and their applications especially in greases.
- CO 6: Students will come to know about silicones and phosphazenes.

Paper: CH 305 Physical Chemistry Theory

- CO 1: Students will have a detailed idea of statistical mechanics and their applications.
- CO 2: Students will have thorough knowledge about the different types of solutions, dilute and concentrated. They will also learn about the colligative properties and their relation to different solutions.

CO 3: Students will be capable of understanding phases and how phase equilibria of two components are related.

CO 4: Enables to conceptualize photochemistry, its laws and to analyze the impact of photochemistry in sustainable development to help society.

Paper: CH 306 Organic Chemistry Theory

CO 1: Students will acquire knowledge about the organic synthesis via enolates.

CO 2: Students will be introduced about heterocyclic compounds in organic chemistry.

CO 3: Students will come to know about the change of properties of organic compounds by introducing heteroatom amongst cyclic hydrocarbons.

CO 4: Students will be taught about proteins amino acids and peptides.

CO 5: Students will be able to differentiate between primary, secondary, tertiary structure of proteins.

CO 6: Students will get to know about the applications of heterocyclic compounds.

CO 7: Students will inculcate knowledge about the industrially important inorganic polymers and their applications in everyday life.

Paper: CH 307 Practical

CO 1: Students will have a vast idea of different types of salts and the factors on which they are categorized into different groups.

CO 2: Students will be able to categorize and maintain a detailed record differentiating different radicals on basis of different factors.

CO 3: Students will learn about the different organic synthesis.

CO 4: Students will acquire comparative knowledge of different types of chromatography.

CO 5: Students will be able to determine R_f values and learn about the separation from R_f values.

CO 6: Students will be skilled to perform conductometry experiments.

CO 7: Students will experience to handle PH meter and potentiometer through various experiments.

B.Sc. (Non-Medical) Mathematics**Semester I****Paper: BM 111 Algebra**

CO 1: Student will learn to find the roots of the quadratic, cubic and biquadratic equations as well as solution of various linear equations, fraction equations etc.

CO2: Using Matrices, Various types of equations can be solved.

CO3: General strategy of equation solving to the problems of optimization, Business and Logical problems, grouping system can be utilized.

Paper: BM 112 Calculus

CO 1: Concept of limit, continuity and differentiability is used to analyze the graph, extrema of function by classifying maxima, minima inflexive nature.

CO 2: Anti derivative i.e. integration and its applications are useful for evaluating quadratic and other applied problems.

CO 3: Concept of trigonometric, exponential, Logarithmic functions, inverse functions, hyperbolic functions and their application is helpful to many real-world situations.

Paper: BM 113 Solid Geometry

CO 1: It emphasis the study of points, lines, shapes, and regions of solids and surface identification.

CO 2: Considering various parameters, different geometrical figures and shapes can be traced.

Semester- II**Paper: BM 121 Number Theory and Trigonometric**

CO 1: Number theory is helpful to students to understand the concept of prime numbers, prime factors, congruence's, quadratic residues, Fermat's theorem, Chinese remainder theorem for solution of simultaneous equations.

CO 2: Number theory plays a vital role to coding and decoding system i.e. cryptography which is used to protect the electronically transmitted data.

CO 3: Knowledge of trigonometric, exponential and hyperbolic functions is used to find the n^{th} roots of equations.

Paper: BM 122 Ordinary Differential Equations

CO 1: It shows awareness about the classification, formation and solution of various initial and boundary value differential equations.

CO 2: Students will learn to solve homogeneous, Non-homogenous differential equation which is useful to real world scenario of applied physics, modeling, numerical solutions of various problems etc.

Paper: BM 123 Vector Calculus

CO 1: It helps to understand the nature of quantities having magnitude and direction i.e. differentiating between scalar and vector quantities.

CO 2: Students will learn cross product, dot product, scalar triple and vector triple product for finding the type of vectors e.g. orthogonal, irrotational and solenoidal nature.

CO: 3 Green's theorem, Stoke's theorem etc. are used to evaluate multiple integrals.

Semester- III

Paper: BM 231 Advanced Calculus

CO 1: Students will be able to learn maxima and minima of functions of two variables.

CO 2: To understand different indeterminate forms of limit, continuity, discontinuity of functions of two variables.

CO 3: It will help to understand behavior of curves in space.

Paper: BM 232 Partial Differential Equations

CO 1: Student will learn classification and solution of partial differential equations by conditions at boundary of the domain with different methods.

CO 2: To derive wave, heat equation etc. in one-dimensional and two- dimensional.

CO 3: To classify Partial differential equations and transform into canonical form.

Paper: BM 233 Statics

CO 1: Students will learn the basic concept of mechanics, equilibrium of rigid bodies.

CO 2: Students will understand the ability to isolate rigid bodies and to draw clear and appropriate free body diagrams.

CO 3: Students will analyze equilibrium conditions under the effect of the external forces acting on the rigid and to simplify different problems using the basic principles of mechanics.

Semester- IV

Paper: BM 241 Sequences and Series

CO 1: Students will learn the concepts of sequences, their types i.e. finite, infinite, bounded, monotonic, convergent, divergent sequence etc.

CO 2: Students will understand the concept of infinite series, sequence of partial sums, and their convergence/divergence using concepts of sequences, sum of convergent series.

CO 3: Students will learn various tests like p-series test, comparison tests, alternating series test, root test, ratio test to check the convergence or divergence of sequences and series.

Paper: BM 242 Special Functions and Integral Transform

CO 1: Students will learn to analyze the properties of special functions by their integral representations.

CO 2: Student will learn the concepts of solving different equations by the properties of Fourier Transform, Laplace Transform.

CO 3: Students will determine the properties of Legendre's polynomial which may be solved by application of special functions.

Paper: BM 243 Programming in C & Numerical Methods

CO 1: Students will be able to learn effective usage of arrays, structures, functions, pointers etc.

CO 2: Students will study different numerical methods to solve algebraic, transcendental equation, linear system of equations.

CO 3: Students will learn practical knowledge of C to apply it to learn the solution of various equations.

Semester- V**Paper: BM 351 Real Analysis**

CO 1: Students will understand the concepts of real numbers, least upper bounds, greatest lower bounds, countable and uncountable sets, limit inferior, superior and limit of sequences.

CO 2: Students will learn metric spaces, open, closed, connected, bounded, totally bounded or compact sets in metric spaces.

CO 3: Students will learn continuity, discontinuity, uniform continuity of functions in metric spaces.

Paper: BM 352 Groups and Rings

CO 1: Students will understand different algebraic properties in different sets and identify sets under binary operation is group or not, abelian group, subgroups fundamentals theorem of group etc.

CO 2: Students will learn the concepts of rings, fields, unique factorization domain, integral domains and their various properties.

CO 3: Students will study permutation group, symmetries, products and various operations of cycles.

Paper: BM 353 Numerical Analysis

CO 1: To understand theoretical and practical aspects of the use of numerical analysis that will be used in the field of Sciences and in Engineering.

CO 2: Students will learn various methods of numerical integration, approximation, differentiation, numerical solution of ordinary differential equations.

CO 3: Student will learn methods of solution of equation, matrix inversion, calculation of Eigen values and Eigen vectors and will be able to find the numerical approximations and error estimation in a range of problems.

Semester- VI**Paper: BM 361 Real and Complex Analysis**

CO 1: Students will learn to visualize complex numbers as points of \mathbb{C} and stereographic projection of complex plane in Riemann sphere.

CO 2: Students will understand the concept of complex functions, analytic functions, Cauchy-Riemann equations and results of harmonic functions and their properties.

CO 3: Students will understand Jacobians, Beta, Gamma functions, double and triple integral, Fourier series etc.

Paper: BM 362 Linear Algebra

CO 1: Students will learn algebraic and geometric representation of vectors in \mathbb{R}^n and their various operations in matrix algebra, vector spaces etc.

CO 2: Students will understand to determine rank, determinant, Eigen values, diagonalization, orthogonality and orthonormality of vectors.

CO 3: Students will learn dimension, basis of vector space, matrix representing a linear transformation under a given basis and will determine how the matrix changes if the basis is changed.

Paper: BM 363 Dynamics

CO 1: Students will be able to draw free body diagram for a particle or for a rigid body in plane motion, will understand the concepts of mass, velocity, acceleration, force, work and energy etc.

CO 2: Students will learn to analyse the general motion of rigid body on smooth and rough planes.

CO 3: Students will learn Kepler's laws of planetary motion and will be able to solve various problems of applied physics and mechanical engineering.

B.Sc. (Non-Medical) Physics

Semester- I

Paper: PH 101 Classical Mechanics and theory of Relativity

CO 1: This course helps students to understand the basic and fundamental concept of classical mechanics. Learned about the law of conservation of Energy, Linear Momentum, Angular Momentum and apply them to solve problem.

CO 2: This course helps student to understand the basics of potentials and fields, central force, Newton's laws and get knowledge about forces which help them in their daily life. The parameters like velocity and acceleration give knowledge about how vehicle move.

CO 3: This course helps students to understand the Rolling concept and concept of Inertia which helps them in their daily life. Familiarize with the concept of Lagrangian and Hamiltonian formulation which further helps them to solve problem related to physical systems.

CO 4: This course helps students to understand the fundamental ideas of special theory of relativity such as length contraction, time dilation and mass energy equivalence. It helps them to get the knowledge of coriolis forces, Michelson-Morley experiment.

Paper: PH 102 Electricity Magnetism and Electromagnetic Theory

CO 1: Students learned about a wonderful mathematical Del operator on scalar and vector physical quantities to develop the quantities as mentioned in course objectives and also would be able to build up logical and analytical skill to work on new complex physical world by applying the same Del operator on the physical quantities of their own choice.

CO 2: Would be able to get the knowledge of Gauss's divergence theorem and Stokes law. Students have gained elaborated knowledge about electrostatics and law governing the charge distribution. It helps students to have the knowledge related to theories of magnetism Hystrein loop.

CO 3: Would be able to visualize the invisible world of accelerated charged particle in the form of electromagnetic field or electromagnetic waves which has socio anthropological settings across the world by connecting every human being through communication as outcomes of electromagnetic waves. Students have gained the idea of poynting vector and poynting theorem.

CO 4: Study in depth about bound charges and boundary conditions. This course helps students to have deep understanding about transient current response of CR, LC, LR and LCR circuits which is essential in designing as well as understanding the working of electronic circuits.

Semester- II**Paper: PH 201 Properties of Matter and Kinetic Theory of Gases**

- CO1: This course help students to understand the fundamental concepts related to Hook's law and electric properties of matter that have many applications in daily life.
- CO 2: Students gets proper understanding of bending of beam phenomena, cantilever as well as the concept of twisting couple could open up industrial doors to the student.
- CO 3: This course help students to get the idea of moment of Inertia and help them to calculate moment of inertia for various physical system like solid sphere, cylinder (hollow/solid) etc. Students would be able to calculate the acceleration of a body rolling down on an inclined plane.
- CO 4: The concepts of energy distribution, specific heats and Maxwell distribution of speed have interesting statistical and experimental verification. It helps student to closely realize the theoretical part of curriculum.

Paper: PH 202 Semiconductor Devices

- CO 1: This course helps the student to understand about energy bands in solids, semiconductor zener diode, Pn junctions diode and their characteristics and to get the knowledge regarding photodiode, solar cell, full wave and half wave rectifiers.
- CO 2: Would be able to understand the semiconductor elements in controlling the applied voltage source of voltage and current and how these elements have brought up a big change after the discovery of transistor as a semiconductor device. It helps student to understand how transistor can be used as switch.
- CO 3: Students would be able to understand about DC Load line, transistor as an amplifier. It helps student to observe the effect of positive feedback in generating the oscillations without any prerequisite input and effect of negative feedback in generating the amplification of input signal as this law of physics is explicitly a consequence of law of nature.
- CO 4: This course helps the student to understand the principle and working of C.R.O.

Subject- Physics Practical

- CO 1: The experiments of this course are framed so as to understand comprehensively the meaning of minute observations and Measurements. These experiments are first

lesson to the learners that how imperative the role of measurement in the physical world.

CO 2: All the experiments are based on the theory course of the students in the same year. Therefore, these laboratory experiments are elemental part of the curriculum and helps in improving widespread knowledge to the students.

CO 3: Experiments based on moment of inertia provides a technical hand to the students and open a pathway to the industrial world related to the machinery and vehicles.

CO 4: Experiments based on current and electricity, learner could realize the many theoretical concepts solenoid, magnetism frequency of A.C. mains. These experiments provide answer to many queries of the student which is the part of their thoughts so far.

CO 5: Experiments related to industrial world like photodiode, Pn junction, zener diode etc. helps students in their practical life.

CO 6: Experiments related to measurement of acceleration due to gravity and elastic constant would put up a clear picture of universal constants to the mind of students. Therefore, besides increasing the conceptual qualities, these experiments would further raise the imagination power of students.

Semester- III

Paper: PH 301 Computer Programming and Thermodynamics

CO 1: This course will help to understand the concept of heat and its conversion from one form to another. Thermodynamics can be used in our daily life. Laws of thermodynamics as used in refrigerators, air –conditioners, heat pumps etc. one of the important fields of thermodynamic is heat transfer, which relates to transfer of heat between two media.

CO 2: The students are able to understand the laws of thermodynamic dictate energy behavior, for example, how and why heat which is a form of energy, transfer between different objects.

CO 3: The concept of Maxwell relations allows us to relate changes in one set of thermodynamics variable to other variables.

CO 4: The students get the information about programming which is important to create software and applications that help computer and mobile used in daily life. Due to all these reasons, it's really important to learn how to use programming languages in our daily life. Programming is important to collect, manage, calculate, and analyze processing of data and information accurately.

Paper: PH 302 Wave and Optics-I

CO 1: The students are able to understand and correlate various optical phenomena related to light with practical problems/applications in day to day life.

CO 2: The concept of analytical treatment of Fourier analysis would establish a bridge that link mathematical equation with their physical aspects and comprehensive recognition with conceptual clarity.

CO 3: This course will help to understand the concept of a different dimension of laws of reflection, refraction and other equations based on them is shown in matrix method. These methods result in simplification/alternate of complicated and lengthy equations studied in twelfth class.

CO 4: The students will come to know about wave nature of light is described by interference of light and it answers many observations in our daily life. For example, coloration in the soap bubble, fringe patterns observed somewhere and laser phenomena based on coherence of light. Thus, students are able to observe and analyze various naturally occurring phenomena.

Semester- IV

Paper: PH 401 Statistical Mechanics

CO 1: This course helps the students to understand the methods of statistical mechanics used to develop its statistics for Bose-Einstein, Fermi-Dirac and photon gases.

CO 2: The students are able to understand the concept of microstates and macro states and how the particles are distributed in the system in different states.

CO 3: The students get the information about the macroscopic and microscopic description of temperature, entropy and free energy and their descriptions in terms of probabilities.

CO 4: The concept of canonical and micro canonical ensemble. This is very useful in our daily life.

Paper: PH 402 Subject- Wave and Optics II

CO 1: This course helps the students to understand the description of wave nature of light by interference of light answers many observations in our daily life. For example, coloration in the soap bubble, fringe pattern observed somewhere and laser phenomena based on coherence of light.

CO 2: The students are able to observe and analyze various naturally occurring phenomena.

CO 3: The concept of polarization would comprehensively describe the bifurcation between longitudinal and transverse waves. Along with it, students can learn the practical aspect to distinguish between polarized and unpolarized light.

CO 4: The students are able to understand and correlate various optical phenomena related to light with practical problem/ application in day to day life. For e.g. the distinction between various type of light and different set of polarimeters.

Subject- Physics Practical

CO 1: The students come to know how to make use of handling of the sophisticated optical instruments such as Bi-prism arrangement, telescope and microscope would provide learner an expertise in the field of measurements.

CO 2: The concept of the experiments of the optics division would assist students to recognize and verify the various laws related to the light and optical event which is just a part of their imagination till now.

CO 3: In addition to realize the fundamental concepts of theory, the laboratory experiments could make available learner a potential candidate to be absorbed in the industrial world.

CO 4: The course of computer programming would help the students to get familiar with software skills. It not only develops a skill in the students but also open up another way to the students after completing their graduation course.

Semester- V

Paper: PH 501 Quantum and Laser Physics

CO 1: After studying this course the students shall be able to understand origin of quantum physics, the behaviour of radiation and matter at atomic and subatomic levels.

CO 2: This course helps students to study applications of Schrodinger wave equation.

CO 3: Main features and basic principles of laser will be studied by students. Students will be familiarized with Einstein's Quantum theory of emission and absorption of radiation.

CO 4: Shall enable them to study some specific laser systems and the applications.

Paper: PH 502 Nuclear Physics

CO 1: The objective of this course is to study various properties of nucleus, its structure and nuclear mass spectrograph.

CO 2: Students will learn alpha- disintegration, alpha- drag neutrino hypothesis, beta-drag, energetic of gamma ray and different phenomenon related to radiations interaction with matter.

CO 3: They would be able to study nuclear accelerators understand nuclear reactions, Q value and general aspects of Nuclear fission fusio reactors.

Semester- VI

Paper: PH 601 Solid State and Nano Physics

CO 1: This course helps students to get familiar with an extended knowledge of principles and techniques of solid-state Physics.

CO 2: Students learn to determine the mechanical structure of materials and how this conduct electricity, how they interact with light.

CO 3: It will enable them in understanding the process of determining the structures by x-ray diffraction method.

CO 4: Graduates have a wide variety of opportunities after learning this discipline such as career in applied research and education along with the opportunities in aerospace, engineering industries and importance of Nano-technology and its applications

Paper: PH 602 Atomic and Molecular Spectroscopy

CO 1: Students are able to analyse alkali atoms and their spectrums.

CO 2: After studying this course student could understand the Roman effect which further helps in analysing rotational and translational energies.

CO 3: The analysis of electric and magnetic fields effect on alkali atoms can also be done by students.

Subject- Physics Practical

CO 1: The experiment such as Transistor Amplifier, oscillator would help students get a hold of practical aspects of these electronic devices.

CO 2: In addition, computer programming develops software skills of students helping them to pursue a career in computer world.

CO 3: Students learn to handle the sophisticated optical instruments used to determine its wavelength and resolving power.

CO 4: Along with the knowledge of theoretical concepts, students get knowledge about application of such concepts in real life and build a career out of it.

B.Sc. (Non-Medical) English

Semester: I

Paper: ENG 101

A book title as 'Chronicles of Time' An Anthology of poems is prescribed for the students of semester I of B.Sc. 1st science stream. The course outcomes are as follows:

CO 1: The aim of the course to give the knowledge of the chronicles poets of the time to the students.

CO 2: Simple presentation of the poems step by step discussion and use of examples will help students in mastering the subject.

CO 3: The course focuses on helping the students to develop skills in all the four dimensions of communication namely, listening, speaking, reading and writing.

CO 4: The course will enable the students to use the grammatical structures, translation from Hindi to English accurately and paragraph writing.

CO 5: The course provides an opportunity to the students to improve their grammatical mistake through grammar, 'common errors'.

Semester- II**Paper: ENG 201**

A book titles as 'Ideas Aglow' is prescribed for the students of semester II of science stream.

The course outcomes of this course are as follows:

- CO 1: The aim of the course to give the knowledge of the different writers to the students.
- CO 2: Students will understand the views of different writers as mentioned in the prescribed book.
- CO 3: The course will enable the students for the practical use of language through grammatical structure, translation from English to Hindi.
- CO 4: Precise writing will increase the analysing skill of the students.
- CO 5: The course aim at imparting the communication and writing skills that are needed in their academic and professional pursuits through letter writing.

B.Sc. (Non-Medical) Sanskrit Elective**तृतीय सत्र****Paper: SA 23**

- CO1: संस्कृत चयनिका के माध्यम से संस्कृति, साहित्य, दर्शन संबंधी ज्ञान प्रदान करना।
- CO2: संस्कृत चयनिका में वर्णित भिन्न-भिन्न कहानियों के माध्यम से सामाजिक, राजनैतिक तथा व्यवहारिक ज्ञान प्रदान करना।
- CO3: संस्कृत व्याकरण के माध्यम से भाषा का वाक्यप्रयोग के लिए शब्द तथा क्रिया का ज्ञान प्रदान करना।
- CO4: संधि के माध्यम से वर्णों का मेल करना सिखाना।

चतुर्थ सत्र**Paper: SA 24**

- CO1: संस्कृत चयनिका के माध्यम से संस्कृति, साहित्य, दर्शन संबंधी ज्ञान प्रदान करना।
- CO2: संस्कृत चयनिका में वर्णित भिन्न-भिन्न कहानियों के माध्यम से सामाजिक, राजनैतिक तथा व्यवहारिक ज्ञान प्रदान करना।

CO3: संस्कृत व्याकरण के माध्यम से भाषा का वाक्यप्रयोग के लिए शब्द तथा क्रिया का ज्ञान प्रदान करना।

CO4: संधि के माध्यम से वर्णों का मेल करना सिखाना।

B.Sc. (Non-Medical) Hindi Elective

तृतीय सत्र

Paper: HI 23

CO1: विज्ञान संकाय के विद्यार्थियों को हिंदी के सुप्रिया साहित्यकारों की विस्तृत जानकारी देना।

CO2: निबंधों के माध्यम से विद्यार्थियों को वर्तमान काल की विभिन्न सामाजिक व वैश्विक समस्याओं से परिचित करवाना।

CO3: विद्यार्थियों को पत्र लेखन कला तथा वैज्ञानिक शब्दावली के विषय में जानकारी प्रदान करना। विद्यार्थियों में हिंदी साहित्य के प्रति रुचि उत्पन्न करना।

चतुर्थ सत्र

Paper: HI 24

CO1: विद्यार्थियों को एकांकियों के विषय में विस्तृत जानकारी प्रदान करवाना।

CO2: निबंधों के माध्यम से वर्तमान समस्याओं के विद्यार्थियों को परिचित करवाना।

CO3: वैज्ञानिक शब्दावली के विषय में विस्तार से जानकारी देना।

CO4: विज्ञान संकाय के विद्यार्थियों में हिंदी साहित्य के प्रति रुचि उत्पन्न करना।

B.Sc. (Non-Medical) Computer Awareness

Course Outcomes (COs)

Semester-I

Paper: CAT 22 Computer Awareness(level I)

CO1: This course will give an understanding of windows operating system, control panel, desktop, applications, files and folders in computer.

CO2: This would be able to use word processor, create and edit document, formatting, advance features of MS word, charts etc.

CO3: This would be able to use spread sheet, creating, editing and formatting spread sheet, and formula and functions, and creating charts in MS excel.

CO4: This would be able to use power point presentation, creating, manipulating and enhancing slides, animations, and inserting different sound effects.

CO5: At the end of this course, Students will be able to create emails, send and view emails, and send an attachment. Students will also understand the concept of internet, search engine and web browser.

B.Sc. (Non-Medical) Environment Studies

Course Outcomes (COs)

Paper: EVS(Q) Environment Studies

Semester-II

CO1: Course offered at UG level compulsory for all streams aim to shape the mind of students sensitive towards environment & their surroundings.

CO2: Students learn how environment studies is a multi-disciplinary in nature & how it is connected to other branches of humanities, commerce & science.

CO3: Students gain knowledge different natural resources, renewable & non-renewable resources, their utilization & deletion, ecosystems & their interaction with each other.

CO4: Familiarity arises among students for biodiversity of flora and fauna and its conservation.

CO5: Major social issues as pollution, global warming, green-house effect, water conservation draws the attention of students.

CO6: Some other issues such population explosion Human rights, AIDS, drugs are also there to increase awareness among students.

DAYANAND MAHILA MAHARAJA UNIVERSITY

Program Outcomes (POs) for B.Sc. (Non-Medical)

- PO 1: Development scientific attitude and temperament among students.
- PO 2: B.Sc. (N.M.) program empower the graduates to appear for various competitive examination or choose PG program of their choice.
- PO 3: Science graduate student can pursue his/ her career in various fields such as education, banking, public service, industries mainly related to engineering works, pharma, electronics, biotechnology, computers.
- PO 4: Observation, precision, logical thinking, systematic approach, qualitative and quantitative decision-making qualities are developed in students.
-

DAYANAND MAHILA MAHAVIDYALAYA

Program Specific Outcome (PSOs) for B.Sc. (Non-Medical)

- PSO1: Students acquire knowledge about fundamental theories of chemical and scientific phenomena and their application in everyday life.
- PSO2: Students get hands on training of scientific experiments which enables them to record, analyse and measure the results with accuracy.
- PSO3: Program also opens the path for master's degree in chemistry/ physics/ mathematics/ computer science or even in other fields also such as management, pharma industry, humanities, defence, public and banking sector.
- PSO4: Present subject area of science will increase the capability of students in exploring interdisciplinary scientific research area.
- PSO5: Basic knowledge of mathematics and practical application of computer programming in FORTRAN and other scientific languages is gained so as to solve scientific problems.
-

DAYANAND MAHILA MAHAVIDYALAYA

COURSE OUTCOMES

B.Sc. Non-Medical with Computer Science

Semester -I

Paper: CS-I Computer and Programming Fundamental

CO 1: Students will be able to learn the basic concept of computer, its working, characteristics, merits applications and computer memory.

CO 2: This course will give an understanding of concept of input output devices, Understanding the software, concept of operating system and types of operating system.

CO 3: The Students will able to learn the concept of problem solving, different techniques of problem solving and structured programming.

CO 4: This would be able to understand sorting, searching, merging, computer language, language translator and system utilities.

Paper: CS-II PC Software

CO 1: This course will give an understanding of windows, desktop, applications, files and folders in computer.

CO 2: This would be able to use word processor, create and edit document, formatting, advance features of MS word.

CO 3: This would be able to use spread sheet, creating, editing and formatting spread sheet, and advance features of MS excel.

CO 4: This would be able to use power point presentation, creating and enhancing slides, animations, and inserting different sound effects.

Semester-II

Paper: CS-I Programming in 'C'

CO 1: Students will be able to learn the concept of C language, different characteristics, identifiers, keywords, data types, and input output functions.

CO 2: This will help the students to learn different operations and expression used in C, and type casting, different operators and decision-making statements.

CO 3: This will be able to learn decision making and loops, Functions and recursion.

CO 4: This would be able to learn arrays in C, Structure and union.

Paper: CS-II Logical Organization

CO 1: The course content will be able to Use of number system, inter conversion of number system and error detecting and correcting code.

CO 2: This would help the students to learn Boolean functions, simplification of Boolean function and karnaugh map.

CO 3: This would be able to learn different types of Gates, Adder, subtracter, encoder, decoder, multiplexer and demultiplexer.

CO 4: This would be able to learn flip flops, registers and different type of counters.

Paper: CS-III Practical (PC- software & Programming in 'C')

CO1: This course helps the students to create, open, save, edit and format document. They should be able to insert picture pictures, formats text and graphing options in MS word.

CO2: Students should be able to understand and handle large volume data using spread sheet with the help of formulas, charts, graphs and function available in MS excel.

CO3: They should be able to prepare power point presentation using features like sound effects, templates, drawing tools, charts, animation effects, to make their presentation more interactive and attractive.

CO4: 'C' language is a general-purpose programming language and can efficiently work on enterprise applications, games, graphics etc. C language has a rich library of built in functions. By learning this language students can able to develop any application like game, enterprise application, animations and graphics etc.

Semester- III

Paper: CS-1 Data Structure

CO 1: The course content would help the students to understand the concept of Data Structure, their categories, operations, Applications, complexity of algorithm, string and their operations, pattern matching algorithm.

CO2: Students will be able to understand Arrays, Traversal, insertions and deletion in array, parallel array, sparse arrays, Linked list, Different algorithm of linked list, two-way linked list, Garbage collection, applications of linked list.

CO 3: Student Will be able to learn, stack, and different applications and operations of stack, Queue, different operation on Queue, Dequeue, Priority Queue.

CO 4: This course will help the students to understand concept of tree, Binary tree, travelling of tree, Graph theory, and representation of graph.

Paper: CS-II Software Engineering

CO 1: The course content will help the students to understand the concept of software engineering, software life cycle, and different process models.

CO 2: This will help the students to learn software requirements analysis, need for SRS, Problem analysis, Requirement Specification.

CO 3: This will help the students to learn Data flow diagram, Software project planning, and project scheduling and planning.

CO4: This will help the student to learn Testing of software and different types of testing, Maintenance and types of maintenance.

Semester- IV

Paper: CS-1 Object Oriented with C++

CO 1: It helps the students to understand the basic features of C++ and object-oriented design.

CO 2: Students will be able to apply the major object-oriented concepts to implement object-oriented programs in C++, encapsulation, Inheritance and Polymorphism.

CO 3: Students will understand how to evaluate to allocate dynamic memory to variables and handle file and data in C++ using and concepts like virtual classes, operator overloading and template.

Paper: CS-II Operating System

CO1: The course content of this subject will help the students to learn about operating system and methodologies for implementation of operating System.

CO 2: This would help the students to learn about process management, CPU Scheduling and Deadlock concept.

CO3: This would help the students to learn about concurrent process and storage management, memory management.

CO4: This would help the students to learn about file and device management, Directory system and file protection mechanism.

Paper: CS-III Practical (Data Structure implementation using 'C' & Programming with C++)

CO 1: This would help the students to use stored data in organized manner. Students will learn how to implement different programs of data structure using 'C' Language.

CO 2: Students will be able to implement the object-oriented concept.

CO 3: Demonstrate student's practical experience of object-oriented design in C++.

CO 4: Enable students to implement and handle file data in C++ and dynamic memory allocation.

CO 5: Make students understand to implement the generic template and type conversion in C++.

Semester -V

Paper: CS-I Fundamental of Database System

CO 1: Will enable students to differentiate between traditional file system with database management system by specifying features, merits, functions and characteristics of database system.

CO 2: This course will help the students to understand database system architecture, their schemas, mappings and instances.

CO 3: Students will be able to understand data models, design E-R diagram.

CO 4: This course will help the students to understand classification of database management system, Relational data model, different keys and constraints.

Paper: CS-II Web Designing

CO 1: The course contents will make the students to get familiarized with basic of the internet, WWW and use of different internet tools.

CO 2: Students will be able to understand the concepts of website designing and development, Home page, domain name, web publishing and hosting.

CO 3: The course contents will make the students to get familiarized with HTML, Hypertext, HTML features and HTML tags.

CO 4: Students will be able to acquire knowledge and skills for developing web pages using different advanced HTML tags.

Semester-VI

Paper: CS-I Relational Data Base Management System

CO 1: The course will help the students to understand the data models, codd's rule for relational model and relational algebra.

CO 2: Students will be able to implement normalized database structure using different normalized forms and learn about relation calculus and Functional Dependencies.

CO 3: Will provide knowledge of SQL (DDL, DML, and DCL) and constraint in SQL.

CO 4: Will provide knowledge of PL/SQL, their Character Set, Data Types, Declaration and Assignment of Variables and Control Structure.

Paper: CS-II Computer Network

CO 1: Students will be able to learn the concept of data communication, uses of computer network, types, topology, network hardware components, network design issues and protocols, OSI and TCP/IP model.

CO 2: Students will be able to acquire knowledge about analog and digital communication, Guided and Wireless Transmission Media, Communication Satellites, Switching, Multiplexing, Modems and modulation techniques.

CO 3: The course will help the students to understand the Data Link Layer Design issues, Error Detection and Correction methods, Sliding Window Protocols and LAN technologies.

CO 4: Students will be able to learn about different Routing Algorithms, DNS, E-mail, WWW services, Network Security Issues, security attacks and encryption methods.

Paper: CS-III Practical (SQL and PL/SQL & Web designing using HTML)

CO 1: The practical will let the students to demonstrate the important HTML tags for designing static pages using HTML.

CO 2: Students will be able to learn the basic structure of HTML using different tags and understand the processes of website development i.e. designing the web page, writing the codes using HTML tags to design Web Pages.

CO 3: Make Students learn to insert text images, animated graphics, lists, tables, forms and to create frames in web pages using HTML tags.

CO 4: Students will be able to learn and use different SQL syntaxes, DDL, DML, DCL commands and Views and techniques to query data in database systems.

CO 5: Students will be able to learn different functions and operators, joins in SQL and to implement complex SQL queries to access data from databases.

DAYANAND MAHILA MAHAVIDYALAYA

**Programme B.Sc. (Physics, Mathematics,
Hindi/English) common for B.Sc. Computer
Science Programme**

**Programme Outcomes (POs) of B. Sc. (Computer
Science)**

- PO 1: These days almost every official/ non-official task like submission of online application for admission, recruitment, payment of fees etc. is being done with the help of computer so the study of computer science is beneficial. The Students learn the technology and explore their knowledge in the field of computer related technology.
- PO 2: Critical Thinking- The students while studying the subject of computer science may consult the research journals pertaining to computer science for critical analysis of various functions of the computer.
- PO 3: Case Study- The students make the projects using various programming languages and develop their creative thinking. They explore themselves in the field of technology. The students are motivated to think about various kinds of problems and try to find the solutions so that they can think about various possible outcomes.
- PO 4: Communication Skills- The communication skills of the students are enhanced as they get various opportunities of improving their skills through various presentations, discussions about various topics pertaining to the computer science.
- PO 5: Career Orientation- With regard to the career point of view, the course provides opportunities to the students to work with various types of organizations. In today's scenario knowledge of various functions of the computer is required in every organization so, these courses enhance the capabilities of the students so that they are in a position to work with any organization.
-

Programme Specific Outcomes (PSOs) for B.Sc. (Computer Science)

PSO1: Demonstrate basic knowledge of computer applications and apply standard practices in software project development.

PSO2: Understand, analyse and develop computer programs for efficient design of computer-based systems varying complexity.

PSO3: Programme also open the path for master degree in computer science and in the field of IT, Management, banking and public sectors.

PSO4: Students make the projects using various programming languages and develop their critical and creative thinking.

DAYANAND MAHILA MAHAVIDYALAYA

COURSE OUTCOME

Name of Programme: BTM

Semester-I

Paper: BTM 101 English (Compulsory)

CO1: The course provides an opportunity to the students to improve their pronunciation with the help of speech sounds and symbols.

CO2: A brief analysis of essays included in the textbook would help the students to study different aspects of one's societal life on the whole.

CO3: With the help of vocabulary exercises students can improve their vocabulary which in turn helps them to improve their comprehension.

Paper: BTM 102 हिंदी (अनिवार्य)

CO1: मध्यकालीनकाव्य-कुंजकेअंतर्गत- हिंदीसाहित्यकेमध्यकालीनकवियों (कबीर, सूरदास, तुलसीदास, मीराबाई, बिहारी, घनानंदतथारसखान) केमहानएवंप्रेरणादाईव्यक्तित्वएवंकृतित्वसेउनकेद्वाराचितसाहित्यकेभागवतएवंशिल्पगतसौन्दर्यसे, उनकेद्वाराप्रतिपादितउच्चजीवनमूल्योंसेविद्यार्थियोंकोपरिचितकराना।

CO2: हिंदीसाहित्यकाआदिकालकेअंतर्गत- हिंदीसाहित्यकेइतिहासकोलिखनेकीपरंपराकेआरंभविकाससेपरिचितकरातेहुएउसकीव्यापकताकाबोधकराना।हिंदीसाहित्यकेआरंभिककाल'आदिकाल'सेनामकरणमेंविभिन्नविद्वानोंद्वारादिगुणनामोंका उल्लेखकरतेहुए'आदिकाल'नामकीसार्थकतासेअवगतकराना।आदिकालकीराजनीतिक,सामाजिक,आर्थिक,धार्मिक,सांस्कृतिकपरिस्थितियोंसेप्रभावितआदिकालीनहिंदीसाहित्यसेपरिचितकराना।आदिकालकीवीररससेपरिपूर्णरासोकाव्यपरंपराकेमाध्यमसेभारतीयराजाओंकीशौर्यपूर्णगाथाओंसे,राजनीतिककौशलसे,दरबारीकवियोंकेरासोकाव्यकेरचनात्मकउद्देश्यएवंसौष्टवसेपरिचितकराना।

CO3: काव्यशास्त्रपरआधारितविषयकेअंतर्गत- काव्यकेस्वरूपकानिर्माणकरनेवालेप्रमुखतत्वों-बुद्धि, कल्पना, भाव, विचारऔरभाषाकाज्ञानप्रदानकरना।रसकेस्वरूप, अंगएवंवेदोंसेपरिचितकरातेहुएकाव्यकेभावपक्षपरप्रकाशडालना।अलंकार, छंद, शब्दशक्तियोंतथाशब्दगुणोंकेद्वाराकाव्यकेशिल्पसौन्दर्यकाविश्लेषणकरतेहुएकाव्यरचनाहेतुविद्यार्थियोंकोप्रेरितकरना।

Paper: BTM 103 Business Environment for Tourism

CO1: After completing this course students will be able to understand the nature of business environment and its components in tourism sector.

CO2: Students being aware about the environmental factor that affect the tourism industry.

CO3: The students will be able to explain the effect of government policies in tourism sector.

CO4: It also helps them in analyzing how an entity operates in a business environment and its effect on tourism industries.

CO5: Students will be able to explain the legal framework that regulates the tourism in business environment.

Paper: BTM 104 Introduction to Tourism

CO1: The primary purpose of the paper is to acquaint the students about the basic and preliminary knowledge of the terms, concepts, systems and trends in tourism.

CO2: It will form the first step to move forward to interact with the advanced knowledge pertaining to tourism.

CO3: Students will be able to understand motivational factors.
